## BMD-350 Module Labeling:

Due to the extreme size constraints, the FCC and IC have granted an exemption for the BMD-350 module from requiring the FCC ID and IC number to be physically located on the module. However, the host product is still required to affix the **FCC ID: 2AA9B05** and **IC: 12208A-05** to the outside of the host product and in the user manual.

### FCC End product labeling :

The final end product must be labeled in a visible area with the following:

- BMD-350: "Contains **FCC ID: 2AA9B05**"  
Any similar wording that expresses the same meaning may be used.

The FCC Statement below should also be included on the label. When not possible, the FCC Statement should be included in the User Manual of the host device.

"This device complies with part 15 of the FCC rules.

Operation is subject to the following two conditions. (1) This device may not cause harmful interference. (2) This device must accept any interference received, including interference that may cause undesired operation."

### IC End product labeling :

The host device shall be properly labelled to identify the module within the host device. The final end product must be labeled in a visible area with the following:

- BMD-350: "Contains **IC: 12208A-05**"

Any similar wording that expresses the same meaning may be used.

The IC Statement below should also be included on the label. When not possible, the IC Statement should be included in the User Manual of the host device.

"This device complies with Industry Canada license-exempt RSS standard(s). Operation is subject to the following two conditions: (1) this device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of the device.

Le présent appareil est conforme aux CNR d'Industrie Canada applicables aux appareils radio exempts de licence. L'exploitation est autorisée aux deux conditions suivantes : (1) l'appareil ne doit pas produire de brouillage, et (2) l'utilisateur de l'appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d'en compromettre le fonctionnement."
