Choose your router **SSID(WiFi)**, Click "**Apply**", then appear "**Wireless Network selected!**".

Click "Network", then "Wireless Setup".

Then input your router **WPA (WiFi Password)** and click "**Apply**". You'll see: "Wireless Setup Accepted Successfully!"

**Finished!**  
Now you can unplug the network cable!

**Frequently asked questions**

- Q: How many users can view the same camera at the same time?  
A: 16
- Q: How many cameras can we view in one window?  
A: 36
- Q: How many cameras can we view in the browser?  
A: Countless. Depends on the network speed.
- Q: When the camera is viewing in the browser, can we use the same PC and view the same camera in another browser window?  
A: No, the camera knows it's already open.

- Q: Can we use "Camera Setup" and "Multi-Live" at the same time in the same computer?  
A: Only one of them will work, depending on who grabs the IP first.

- Q: Can we add DDNS in the Multi-Live to view videos in one software window and how many would it support?  
A: Yes. Of course. Up to 36.

- Q: Using DOD IP camera, why only see black screen in my iPhone, iPad, Android?  
A: The video size is too big. The network speed is too slow. Get to the setting, choose low quality, then you'll see fluent videos. (Details see the manual in CD)

- For more FAQ see the manual in CD.

## **FCC WARNING**

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.

NOTE 1: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

NOTE 2: Any changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device must be installed to provide a separation distance of at least 20 cm from all persons and must not be collocated or operating in conjunction with any other antenna or transmitter.
