Features At A Glance

Send Photos

Use the Skylight app to send dozens of photos at once or attach up to 25MB of photos when emailing to your unique Skylight email address, and the photos will automatically appear on your Frame.

Swipe

When photos arrive, they'll play in a slideshow. Swipe to view additional photos.

Zoom

To zoom into a photo so it fills the screen, take two fingers (e.g. your two index fingers), and pinch to zoom.

Heart Button

If you love a photo, tap the heart button in the lower-right corner of the screen, and we'll email the sender to tell them you loved it! You can also hide the heart button by going to Settings > Advanced Features.

WiFi

Skylight requires WiFi for initial setup and to receive new photos, but you can still view new photos without a WiFi connection.

Skylight Plus

If you have purchased the **Skylight Plus plan**, you can manage all of the Frames under your account and gain access to these premium features:

Mobile App

Additional access to view photo history and control your Frame remotely, and more.

Albums

Create, edit, and view photo albums in the app and on your Frame.

Videos

Send videos to your Frame via email, mobile app, or Skylight Web (app.ourskylight.com). Video sound can be enabled on your Frame.

Captions

Send photos with captions using the app or Skylight Web.

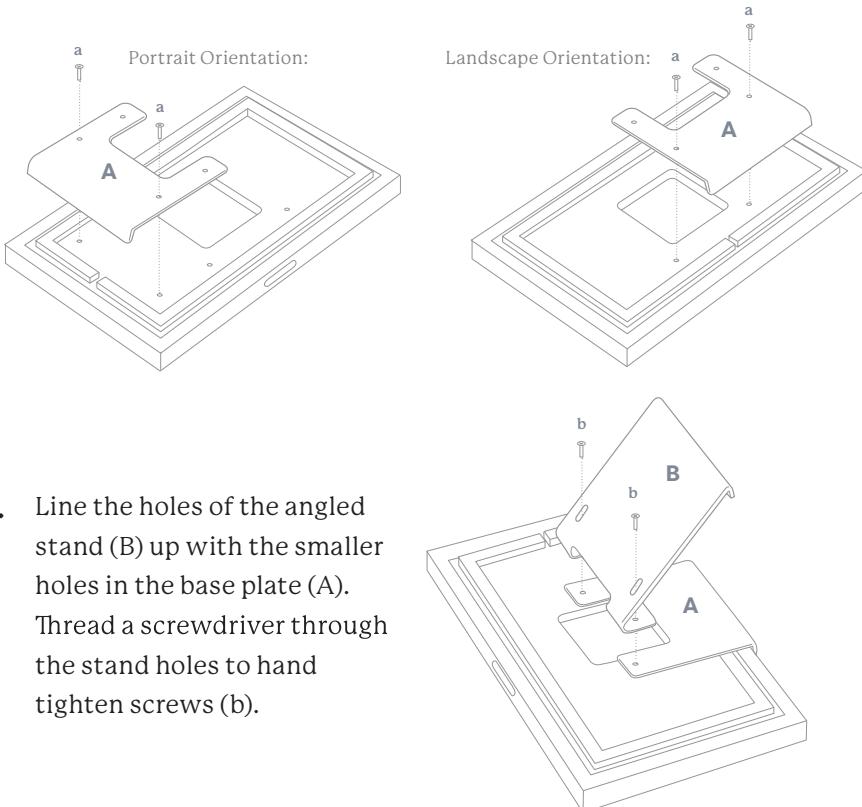

Skylight Plus can also be purchased in-app or at www.skyliightframe.com/plus.

Setup Instructions

Display your Frame horizontally or vertically and photos will automatically rotate to fit the Frame's orientation. For video instructions, visit youtube.com/c/SkylightFamily

Stand

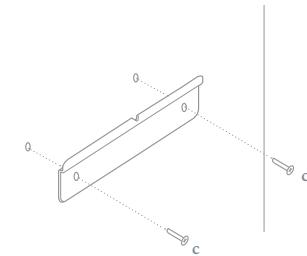

1. Lay the device face down on a flat surface, and align the holes of base plate (A) with the holes on the back of the device. Use screws (a) to secure.

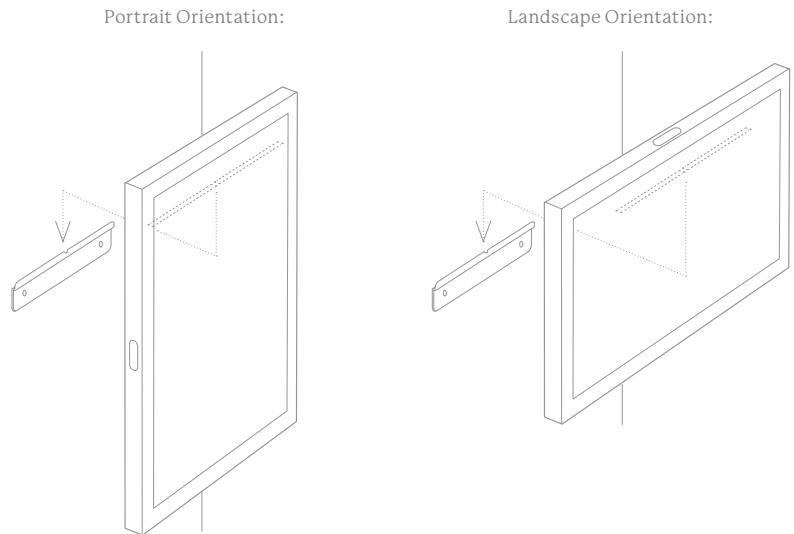

2. Line the holes of the angled stand (B) up with the smaller holes in the base plate (A). Thread a screwdriver through the stand holes to hand tighten screws (b).

Wall Mount

1. Attach the mount to the wall using the provided anchors and matching screws (c), with the pleat facing towards you.

2. Align the pleat with the grooves located at the back of the device, near the top, and hook the device on.

Getting Started

1. Plug the power adapter into an outlet

Plug the round end of the cord into the port on the back of your Frame marked 'Power'.

2. Download the Skylight app

Search "Skylight App" in your app store or scan the QR code below. With the app, you can view and send photos from your Frame, like and comment on photos, and more.

download

Connect to WiFi

1. Select your network

A list of available WiFi networks will appear on the right side of the screen. Tap to choose your network from the list. Swipe up if the list is long. If your network does not appear, wait for 30 seconds and check once more.

2. Enter your password

If your WiFi requires a password, a prompt will appear. Type in your password using the onscreen keyboard.

Activate

1. Create your Frame's email address

Download the app or visit ourskylight.com/finalstep to make an account and activate your Frame. Make sure you select "Frame" for device type.

2. Use your code

Once you have created your Frame's email address, our system will give you a 6-digit code. Enter this code on your Frame using the on-screen keyboard.

3. Configure Settings

Access your Frame's settings by tapping on the gear icon to find your device's email address and configure your device.

Share

Invite Others

Share your Frame's unique email address with the whole family, or invite them to send directly from the app. The more people you invite, the more photos you'll get!

Send Photos

Share photos via email (as attachments) or upload from the app. The subject and contents of an email don't matter - Skylight just grabs attachments.

Rotate

Your photos will automatically rotate to accommodate your Frame's displayed orientation. You can also rotate photos by tapping the screen and selecting rotate from the menu bar.

Settings

Tap the screen to see the Settings Bar. From here, you can access:

- **Delete:** Remove photos from your Frame
- **Rotate:** Rotate photos on your Frame
- **Pause:** Pause on your favorite photos
- **Albums:** View and manage your albums (Plus feature)
- **Gallery:** View all of your photos and albums

Advanced Features

Change the slideshow speed or shuffle your photos.

How It Works

Check your Skylight email address, check your WiFi status, or reset your WiFi.

Sleep Mode

Ensure your Skylight screen goes to sleep at the same time each night and wakes up at the same time each morning.

You can manually enter sleep mode or create an automated sleep schedule for your Frame.

Need Help?

If you have any questions about how to use or set up your Skylight Frame, please visit our **User Guide** at skylightframe.com/support. Or contact us at help@skylightframe.com

Make sure to download the Skylight app to get the most out of your Calendar!

RF Exposure Statement

This equipment complies with the FCC RF radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with a minimum distance of 20cm between the radiator and any part of your body. This equipment meets the exemption from the routine evaluation limits in section 2.5 of RSS-102. It should be installed and operated with a minimum distance of 20cm between the radiator and any part of your body.

Cet équipement est conforme à l'exemption des limites d'évaluation habituelle de la section 2.5 de la norme RSS-102. Il doit être installé et utilisé à une distance minimale de 20 cm entre le radiateur et toute partie de votre corps.

FCC Warning

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

NOTE 1: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

NOTE 2: Any changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

IC WARNING

This device contains licence-exempt transmitter(s) that comply with Innovation, Science and Economic Development Canada's licence-exempt RSS(s). Operation is subject to the following two conditions:

(1) This device may not cause interference.
(2) This device must accept any interference, including interference that may cause undesired operation of the device.

L'émetteur/récepteur exempt de licence contenu dans le présent appareil est conforme aux CNR d'Innovation, Sciences et Développement économique Canada applicables aux appareils radio exempts de licence. L'exploitation est autorisée aux deux conditions suivantes:

1. L'appareil ne doit pas produire de brouillage;
2. L'appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d'en compromettre le fonctionnement.

The device is restricted to indoor use only when operating in the 5150 to 5250 MHz frequency range.

Lorsque l'appareil fonctionne dans la gamme de fréquences de 5150 à 5250 MHz, il est limité à une utilisation en intérieur uniquement.
