

Product Difference Statement

Regarding the amaran Portable Photography Light products for this certification, there are two models: amaran Ace 25x and amaran Ace 25c.

The differences between them are as follows:

1. The amaran Ace 25x is a bi-color product, while the amaran Ace 25c is a full-color product. They use different types of LED beads.

Apart from this difference, all other aspects are the same.
