Re: FCC ID label placement

Regarding FCC ID label placement for this application, Trellie, Inc. wishes to place the label (inside the battery compartment or somewhere on device). This location will offer and ensure the end user opportunity to view the label before operation. The identifier label will be readily viewable each time the (battery is removed or replaced, or some other function like installation). The equipment is sold (without the battery installed or required installation) offering the (end user or installer) exposure to the label before operation. This location will help ensure the longevity of the label as this equipment may be in service in harsh environments.

(Any other comments about location, use, design, or service may be added to explanation like device is small, handheld, curved surfaces, etc)

Trellie, Inc.
