The suggestions below will help you protect your warranty coverage.</div> <div><div>1.Keep all device dry. Precipitation, humidity, and all types of liquids or moisture can contain minerals that will corrode electronic circuits. If your device does get wet, allow it to dry completely.</div><div>2.Do not use or store the device in dusty, dirty areas. Its moving parts and electronic components can be damaged.</div><div>3.Do not store the device in hot areas. High temperatures can shorten the life of electronic devices, damage batteries, and warp or melt certain plastics.</div><div>4. Do not store the device in cold areas. When the device returns to its normal temperature, moisture can form inside the device and damage electronic circuit boards.</div><div>5. Do not attempt to open the device.</div><div>6. Do not drop,knock,or shake the device. Rough handling can break internal circuit boards and fine mechanics.</div><div>7. Do not use harsh chemicals, cleaning solvents, or strong detergents to clean the device.</div><div>8. Do not paint the device. Paint can clog the moving parts and prevent proper operation.</div><div>9. Keep the headset away from direct sunshine for a long time.</div></div> <div>All of the above suggestions apply equally to your device,charger, or any enhancement. If any device is not working properly, take it to the nearest authorized service facility for service.</div>		
Troubleshooting	Important Safety and Operation Information		Important Safety and Operation Information		FCC warning statements:
