Now

We want to apply now a new Class 2 Permissive Change filing to the last PCB grant of equipment for PCB equipment class, dated May 9th 2024.

The change made now to the currently certified equipment is to add LTE Cat-M1 and NB-IoT modes in 3GPP band 85 (698 – 716 MHz) which is actually a superset of band 12 (which includes B17)

This is enabled by SW and without hardware modifications.

No changes are made to transmit power output, modulation or frequency.

Sincerely

Sunpreet Kaur
