

INSTRUCTION MANUAL

Setup and use your digital video baby monitor

Installing Baby Unit

- 1 Connect the small plug of power adapter to the Baby unit and push the Micro USB to the end. Only use the enclosed adapter (5V DC 1000mA). Press the "POWER" button to turn on baby unit. You will see green LED is turned on.

- 2 Place Baby Unit on a flat surface, such as a desk or shelf or mount the camera on a wall.

- 3 Connect the small plug of power adapter to Parent unit and push the connector the end. Only use the enclosed adapter (5V DC 2000mA). Recommend charging time of at least 3 hours before first time use.

Precaution: use of battery for Parent Unit

When battery level is low, the power on off LED flashes red, monitors comes with sound alert and battery icon on LCD display flashes red.

Extend life cycle of battery : Only charge the battery when the battery life indicator is low. Constant recharging of your battery before the low battery indicator light comes on will decrease the life of your batteries.

Optimize battery life : Louder speaker level consume more battery power and shorten battery life. Switch on power saving mode and tune speaker sound level to level 4 to have optimized battery life.

Frequently Asked Questions

Q Battery not holding a charge/Monitor cannot turn on

A Remove battery from battery compartment and reinstall battery.

Q Monitor cannot hold camera connection

A Please check whether monitor is selected to CAMERA SCAN mode. Monitor switches between paired cameras around every 10 seconds. When monitor switch the camera which is not powered on, monitor display Lost Link.

You could use SPLIT VIEW button to select the camera you want to watch.

Frequently Asked Questions

Q Sound Bar

A This sound bar is designed for deaf parents to reflect sound level picked up from camera. You could disable this display in menu.

Q Save more battery energy with ECO mode by switching off both screen and audio

A POWER SAVING button switches off screen and keeps audio on (default setting "SCREEN OFF"). You have another choice of switching off both screen and audio by using ECO mode option.

In ECO mode, both sound and screen is shut off when monitor is entering POWER SAVING. Monitor will be activated when camera detects sound that exceeds the activation sound level you selected (Default level is medium). You could select activation sound level between loud, medium, quiet level in menu.

Q Switch off "On screen tips"

A We try to explain status and function on screen. When you are familiar with this monitor, you could switch off this on screen tips in menu.

Q Pairing Camera

A Choose from unpaired cameras in Menu first, you would see pairing message shows up on screen.

During the pairing message is on screen, press camera pairing button 1 seconds.

When camera and monitor is paired, video is on screen automatically.

- The product should be mounted to a wall or ceiling inly as recommended by the manufacturer.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) This device must accept any interference received, including interference that may cause undesired operation.

Federal Communication Commission Interference Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one of the following measures:

- . Reorient or relocate the receiving antenna.
- . Increase the separation between the equipment and receiver.
- . Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- . Consult the dealer or an experienced radio/TV technician for help.

FCC Caution

To assure continued compliance, any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment. (Example - use only shielded interface cables when connecting to computer or peripheral devices).

FCC Radiation Exposure Statement

This equipment complies with FCC RF radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with a minimum distance of 20 centimeters between the radiator and your body.

This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

The antennas used for this transmitter must be installed to provide a separation distance of at least 20 cm from all persons and must not be co-located or operating in conjunction with any other antenna or transmitter.

Moonybaby's baby monitor warranty policy

Moonybaby will repair or replace (at our option) your unit free of charge for 12 months from the date of purchase if the unit is defective in workmanship or materials. To claim your repair/replacement, the product must be returned to Moonybaby together with a copy of the purchase receipt. In the absence of the purchase receipt, the warranty will be 12 months from the date of manufacture. This warranty does not apply to normal wear or damage from misuse, abuse, improper storage and handling, installation, accident, unauthorized repair or alteration. Please contact our Customer service by Facebook Moonybaby or via email for details.
