FCC COVERED LIST DECLARATION LETTER

Applicant Legal Business Name	Orpyx Medical Technologies Inc.		
Address	Suite 205 1240 20 Ave SE, Calgary, Alberta, Canada T2G 1M8		
FRN	0022756886		
Grantee Code	2AAH8	FCC ID:	2AAH8-OH000010
Authorized Contact Name	Marcel Groenland		
Contact Phone	1-403-389-8645	Contact Email	Marcel.Groenland@orpyx.com

Orpyx Medical Technologies Inc. ("the applicant") certifies:

- the equipment for which authorization is sought is not "covered" equipment prohibited from receiving an equipment authorization pursuant to section 2.903 of the FCC rules.
- as of the date of the filing of the application, the applicant is not identified on the Covered list, established pursuant to §1.50002, as an entity producing "covered" equipment.
- the software to be loaded prior to marketing of the equipment identified above is not "covered" software manufactured by any entity including predecessors, successors, parents, subsidiaries, affiliates or any entity which has rebranded or relabeled the software produced by the entity(ies) identified on the "Covered List".
- the device is not capable of storing or running software listed on the covered list and therefore is inherently compliant.

Justification for compliance with the covered list:

- The firmware installed prior to market launch is developed solely by our internal engineering team.
- No software from any entity listed on the FCC Covered List, or from their affiliates, predecessors, successors, subsidiaries, or any rebranded/repackaged versions thereof, has been incorporated into our device.
- The device has no capability to install, run, or store third-party firmware post-manufacture, thus precluding any potential compliance violations post-deployment. Any updates to the device can only be done using Firmware that has been developed by our internal engineering team.

Technical enforcement for the device:

- Our system has a locked bootloader that rejects any unsigned or unauthorized FW.
- Our bootloader uses cryptographic signature checks during firmware loading to ensure that only authorized FW can be loaded on the device.
- There are no end-user accessible interfaces for modifying the firmware or installing the firmware.

These mechanisms ensure that only firmware explicitly vetted and approved by our organization can be installed or executed, maintaining compliance with FCC rules regarding prohibited software and equipment.
