***Prompt:** The operations of [Menu] for Day or Week display state, please refer to Month display..*

18. Calculator

In main menu, touch  to enter Calculator. It supports four arithmetic operations such as “+”, “-”, “x” and “/”. Slide the screen to switch into functional operations, e.g. Sin, Cos, Tan, Ln, Log,!, π , e, \wedge , etc.

19. Search Callog

In Search Call-log application, search call records by key words or numbers.

20. User Profiles

In User Profiles application, you can select the predefine audio profiles, e.g. General or Silent or Vibration or Outdoor, and can define audio profiles by yourself.

21. Backup

In Backup application, you can backup applications and data, and also restore these applications and data.

***Prompt:** Before executing this function, ensure that T-Flash card has enough space; After backing up applications and data, please don't remove or destroy the backup. Because illegal operations cause data loss or damage, user will take the responsibility by himself.*

22. Downloads

In main menu, touch  to enter, you can view the downloaded files or applications.

23. Settings

In settings, you can perform such operations as: Wireless controls, Sound settings, Display settings, Security & location, Applications, SD Card and Local disk, Date and time, Accessibility, Speech synthesis, About phone, etc.

23.1. Dual SIM Settings:

Set data connection of SIM1 or SIM2, and also set the standby state as SIM1 or SIM2. SIM1 can't transmit with SIM2 simultaneously.

23.2. Wireless Controls

Set WLAN, Bluetooth, Networks, VPN settings, Airplane mode, etc.

23.2.1. Airplane mode

Touch "Airplane Mode" to switch between "On" and "Off". If Airplane mode is On, all the wireless networks will be disconnected automatically in this mode.

Warning: Even if airplane mode is activated, it is forbidden to use on plane or in some *special labs or under hospital equipments, other special environments, etc., so as to prevent the intervention of electronic equipments to the communication or this device, you are advised to power off this device in such environments.*

23.2.2. WLAN On/Off

Touch "WLAN" to switch between "On" and "Off".

Note: Please turn off WLAN to save power when not using.

23.2.3. WLAN Settings

Set up and manage the wireless access points.

- ✧ **Scan WLAN:** Scan and search WLAN devices nearby.
- ✧ **WLAN:** Same as WLAN On/Off.
- ✧ **Network Notification:** Touch this item to switch between "On" and "Off". If network notification is set as "On", the owner will be notified when an open network is available nearby.
- ✧ **WLAN network:** It lists the WLAN network devices, touch one in the list, perform such operations as: connection, disconnection or clear, etc.

Press [Menu],choose "Advanced", perform the following operations:

- ✧ **Advanced:** Set WLAN sleep policy, and view MAC address & IP address.
- ✧ **IP Settings:** Set IP address, Gateway, Netmask, DNS1 and DNS2.
- ✧ **Proxy Settings:** Set Proxy, Port, Proxy Exception list.
- ✧ **Choose Network Dialog:** Choose "Auto Connect" or "Manual Connect" or "Always Ask" ..

23.2.4. Bluetooth On/Off

Touch "Bluetooth" to switch between "On" and "Off".

Note: To save power, please turn off Bluetooth when not using.

23.2.5. Bluetooth settings

You can set Bluetooth On or off, Device name, Discoverable, Scan for devices and list the scanned devices.

- ✧ **Bluetooth On/Off:** Touch "Bluetooth" to switch between "On" or "Off".
- ✧ **Device Name:** It displays the factory device name, touch this item to edit its name.
- ✧ **Discoverable:** Touch "Discoverable" to switch between "On" or "Off". If it is "On", The Bluetooth devices nearby can detect this device.
- ✧ **Scan For Devices:** Touch this item to detect the Bluetooth devices nearby.

- ❖ **Bluetooth Devices List:** When this device find other Bluetooth devices nearby, it will display them in this list, you can click one and then input PIN for matching and connection.

23.2.6. Tethering & Portable hotspot

You can set USB tethering or Portable Wi-Fi hotspot.

- ❖ **USB Tethering:** Set USB tethering on or off.
- ❖ **Portable Wi-Fi Hotspot:** Set Wi-Fi hotspot on or off.
- ❖ **Portable Wi-Fi Hotspot Settings:** Set Portable Wi-Fi hotspot or Configure Wi-Fi hotspot.
- ❖ **Help:** Access to USB Tethering Help.

23.2.7. VPN Settings

In VPN settings, you can add a new VPN, set VPN server, enable Encryption, DNS search domains, etc.

After adding a new VPN , touch it in the VPNs list, and you can connect it to network.

23.2.8. Mobile Networks

In Mobile Networks, you can set Data enabled or Data Roaming or Access Point Names or Network Operators.

- ❖ **Data Connection Setting:** Set Data connection by SIM1 or SIM2 or Off.
- ❖ **Data Roaming:** Set data roaming on or off.
- ❖ **Access Point Names:** Choose Access Point Names.
- ❖ **Network Operators:** Search networks by hand or automatically.

23.3. Call Settings

In Call Settings, you can set SIM1 or SIM2 call Setting or Voicemail or Message Reject or Other call settings, and also set IP dialing or Vibration when answers/hangs up.

23.4. Sound Settings

In sound settings, you can set User Profiles, Ringer Volume, Media Volume, Notification Ringtone, Audible Touch Tones, Audible Selection, Haptic Feedback, etc.

23.5. Display Settings

In display settings, you can perform such operations as “Brightness”, “Auto-rotate Screen”, “Animation”, “Screen Timeout”, etc.

23.6. Security & Location

You can set My Location or Screen Unlock or SIM Card Lock or Passwords or Credential Storage.

23.7. Applications

You can perform the relevant settings of Applications, including: Unknown sources, Manage Applications, Running services, Storage Use, Battery Use, Development.

23.8. Accounts & Sync

You can perform adding accounts and Sync settings.

23.9. Privacy Settings

You can perform the relevant settings of Privacy and Factory data reset.

23.10. Storage

You can perform the relevant settings of SD card or Phone Storage.

23.11. Language & Keyboard

You can select Language or Input Methods , and access to User Dictionary.

23.12. Voice Input & Output

You can perform Voice Input & Output Settings.

23.13. Accessibility

You can manage accessibility options.

Note: This feature is based on the real product.

23.14. Date & Time

You can set date or time or time zone or time format or Auto. Update date and time.

23.15. About Phone

You can check Status or Battery Use or Legal information or Manufacture or Model No. or Android Version or Baseband Version or Kernel Version or Build No.,etc.

V. Applications

1. F-Secure Launcher

In main menu, touch **F-Secure Launcher** to enter F-Secure Launcher, and perform the corresponding operations.

2. NewsHunt

In main menu, touch **NewsHunt** to enter NewsHunt app., you can read news and perform the corresponding operations.

3. Opera Mini

In main menu, touch **Opera Mini** to enter Opera Mini app., and perform the corresponding operations.

4. Play Store

Play store allows you to find and download applications and fun games for your device.

5. SAR (Specific Absorption Rate)

Your device conforms to the Indian guidelines for exposure to radio waves. The limits are given in terms of a unit referred to as the Specific Absorption Rate (SAR), which is a measure of the amount of radio frequency energy absorbed by the body when using a mobile phone. The SAR value as per the Indian guidelines standard is 1.6 Watts per kg (Watt/kg), averaged over a 6 minutes period and taken over a volume containing a mass of 1 gram of human tissue.

VI. How To Resolve Malfunction

If you meet with the abnormal state during using mobile phone, please refer to the following guide to resolve it. If you can not solve, please contact with the designated service center.

1. Phone can not power on?

Possible Reasons for Malfunction	Solutions
----------------------------------	-----------

1. Press [Power] key shorter.	Long press [Power] key over 3 seconds
2. Battery runs out.	Please charge for your phone in time.
3. The battery is installed incorrectly.	Please install it properly.
4. Abnormally using leads phone not to power on.	Please contact the local service centre.

2. Phone can power off auto.?

Possible Reasons for Malfunction	Solutions
1. Battery runs out.	Please charge for your phone in time.
2. Battery is loose.	Please install properly.

3. PIN or PUK locks phone?

Possible Reasons for Malfunction	Solutions
1. Input PIN code wrong.	Please input PIN code correctly.
2. Input PUK code wrong.	Please input PUK code correctly.

Note: If inputting error PIN code 3 times, PIN code will be locked, it needs PUK code to unlock; If inputting PUK code 10 times, SIM card will be locked. Please keep and use the PIN & PUK information, when meeting with problems or difficulties,please consult with the SIM card supplier.

4. Phone call is not good?

Possible Reasons for Malfunction	Solutions
1. The current signal strength is unstable.	You may be in the fast-moving state (by train or car, etc.), according to the signal strength, select a place with good signal to make a call to ensure call quality.
2. Perhaps you are in a poor signal region.	Please move to open areas.

5. You can't receive a call?

Possible Reasons for Malfunction	Solutions
1. Perhaps you set up call forwarding.	According to your needs,please cancel call forwarding.
2. Perhaps you set up call barring.	According to your needs,please cancel call barring.

6. You can't make a call?

Possible Reasons for Malfunction	Solutions
1. Phone power off.	Please power on your phone.
2. Phone is out of the network service area.	Please make sure the current network is in good service.
3. Your SIM card is not proper or out of service fee.	Make sure your SIM card can work properly.
4. Perhaps you set up call barring.	According to your needs,please cancel call barring.
5. The phone screen is locked.	Please unlock the screen according to the prompts.

7. Your phone call voice is low?

Possible Reasons for Malfunction	Solutions
----------------------------------	-----------

1. Call volume is low.	Please adjust your phone call volume to louder.
------------------------	---

8. The other party can't hear your voice?

Possible Reasons for Malfunction	Solutions
1. Mic is too far away from the sound source.	Place the mic near your mouth.
2. The signal is poor or unstable.	Please move to the open areas with good signal.
3. Antenna is assembled not properly.	Please contact the local service centre and have a check.

9. The call alert doesn't ring when a call coming in?

Possible Reasons for Malfunction	Solutions
1. Incoming call alert is set as silent.	Please re-set the incoming call alert as a sound alert.
2. The ring volume is set too low.	Please increase the phone call volume.
3. You set up call forwarding.	Please cancel call forwarding.

10. Battery can't charge?

Possible Reasons for Malfunction	Solutions
1. Battery power runs out or not used for a long time.	Please charge in time after the prompt of "Low Power".
2. Battery is not good with the phone connection.	Please install battery properly.
3. Charger is not good with the phone connection.	Please connect the charger and phone properly till it displays the charging icon on the screen.
4. Perhaps the charger or battery is damaged.	Please contact the company's designated repair centre.
5. The surrounding temperature is too low or too high.	Make sure the phone is in the normal temperature during charging.

11. Phone displays no network?

Possible Reasons for Malfunction	Solutions
1. SIM card is not installed properly.	Please install SIM card properly.
2. There are impurities on the phone and SIM card contacts.	Please ensure that SIM card & phone contacts are clean.
3. The SIM card is invalid	Please check whether the SIM card has been expired
4. The network environment is in a weak-signal areas.	Please move to the strong-signal areas to use cell phone.

12. Phone can't detect the memory card?

Possible Reasons for Malfunction	Solutions
1. T-Flash card is not installed properly.	Please install T-Flash card properly.
2. T-Flash card is damaged.	Please change T-Flash card.

13. Phone is out of memory?

Possible Reasons for Malfunction	Solutions
1. MMS or SMS takes up too much storage space.	Please delete the unwanted SMS or MMS to release space.
2. The browsing history takes up too much storage space.	Select "Browser - Settings - Privacy Settings - to clear the cache to release space.
3. Running too many programs leads to lack of space.	Enter "Settings –Applications—Manage applications" or "Settings –Applications—Running services", force stop some running applications or services.
4. You have installed many applications in your phone.	Enter "Settings – Applications — Manage applications", choose and touch the applications installed by yourself, to uninstall them to release space. Note: The built-in applications can't be uninstalled.

FCC RF EXPOSURE INFORMATION:

WARNING!! Read this information before using your phone

In August 1986 the Federal Communications Commission (FCC) of the United States with its action in Report and Outer FCC 96-326 adopted an updated safety standard for human exposure to radio frequency (RF) electromagnetic energy emitted by FCC regulated transmitters. Those guidelines are consistent with the safety standard previously set by both U.S. and international standards bodies. The design of this phone complies with the FCC guidelines and these international standards. Use only the supplied or an approved antenna. Unauthorized antennas modifications, or attachments could impair call quality, damage the phone, or result in violation of FCC regulations. Do not use the phone with a damaged antenna. If a damaged antenna comes into contact with the skin, a minor burn may result. Please contact your local dealer for replacement antenna.

BODY-WORN OPERATION:

This device was tested for typical body-worn operations with the back of the phone kept 0.5cm from the body. To comply with FCC RF exposure requirements, a minimum separation distance of 0.5cm must be maintained between the user's body and the back of the phone, including the antenna, whether extended or retracted. Third-party belt-clips, holsters and similar accessories containing metallic components shall not be used. Body-worn accessories that cannot maintain 0.5cm separation distance between the user's body and the back of the phone, and have not been tested for typical body-worn operations may not comply with FCC RF exposure limits and should be avoided.

For more information about RF exposure, please visit the FCC website at www.fcc.gov

Your wireless handheld portable telephone is a low power radio transmitter and receiver. When it is ON, it receives and also sends out radio frequency (RF) signals. In August, 1996, the Federal Communications Commissions (FCC) adopted RF exposure guidelines with safety levels for hand-held wireless phones. Those guidelines are consistent with the safety standards previously set by both U.S. and international standards bodies:

<ANSIC95.1> (1992) / <NCRP Report 86> (1986) / <ICIMIRP> (1996)

Those standards were based on comprehensive and periodic evaluations of the relevant scientific literature. For example, over 120 scientists, engineers, and physicians from universities, government health agencies, and industry reviewed the available body of research to develop the ANSI Standard (C95.1). Nevertheless, we recommend that you use a hands-free kit with your phone (such as an earpiece or headset) to avoid potential exposure to RF energy. The design of your phone complies with the FCC guidelines (and those standards).

Use only the supplied or an approved replacement antenna. Unauthorized antennas, modifications, or attachments could damage the phone and may violate FCC regulations.

NORMAL POSITION:

Hold the phone as you would any other telephone with the antenna pointed up and over your shoulder.

TIPS ON EFFICIENT OPERATION:

For your phone to operate most efficiently:

- Extend your antenna fully.
- Do not touch the antenna unnecessarily when the phone is in use. Contact with the antenna affects call quality and may cause the phone to operate at a higher power level than otherwise needed.

RF Exposure Information:

FCC RF Exposure requirements: The highest SAR value reported under this standard during product certification for use next to the body with the minimum separation distance of 0.5cm is 0.914W/kg, next to the head is 1.043W/kg. This transmitter must not be collocated or operating in conjunction with any other antenna or transmitter.

This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions:

- (1) this device may not cause harmful interference, and**
- (2) this device must accept any interference received, including interference that may cause undesired operation.**

NOTE: The manufacturer is not responsible for any radio or TV interference caused by unauthorized modifications to this equipment. Such modifications could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.**
- Increase the separation between the equipment and receiver.**
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.**
- Consult the dealer or an experienced radio/TV technician for help**

Do not use the device with the environment which below minimum -10°C or over maximum 50°C , the device may not work.

Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Ad Hoc function is supported but not able to operate on non-US frequencies.
