

# S901 USER MANUAL

## Preface

Thank you for purchasing the MID. This manual shows how to operate the device smoothly and correctly. Make sure to read this manual carefully before using this product.

## Safety Alerts and Cautions

- ◆ Do not use the tablet in extreme environments, when wet, or when extremely dusty.
- ◆ Do not put it in fire or water.
- ◆ Do not damage the screen when carrying or moving the tablet.
- ◆ Do not try to open the housing.
- ◆ Keep a proper volume when you are using an earphone, to avoid damage to your hearing.
- ◆ Use soft fabric to gently clean the surface shell and LCD screen. Do not use chemicals.
- ◆ Use the in-box power supply only.

# 1. Hardware Introduction

## Keys & Ports

### Power on/off key:

Long press to turn on or off the MID.

Short press to turn on or off the screen when MID is running.

Vol+: Press to increase the sound.

Vol-: Press to lower down sound.

Press the Power and Vol- Keys at the same time to capture your screen.

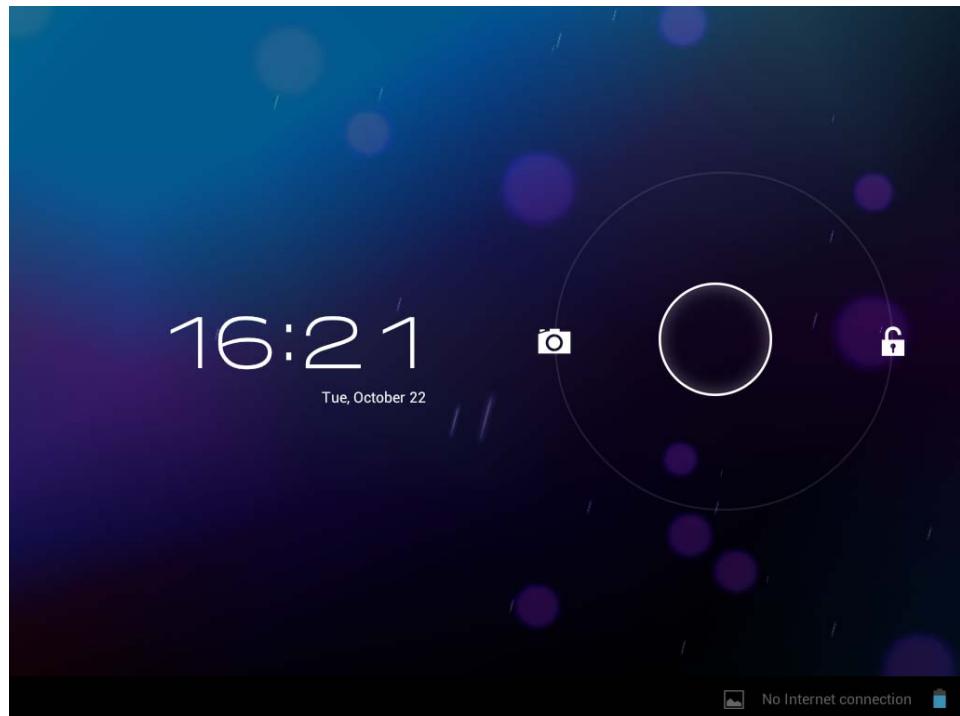

Reset: Stab the reset hole to restart the MID.

Charge: DC2.5mm port. Please connect your charger when your MID reminds you “the battery is low”; please disconnect your charger when the MID battery is full(the LED indicator on the front changes to green from red).

## 2. Software operation guide

This tablet runs Android 4.0 operating system.

### 1) Unlock the screen

When the MID boots up, you need to unlock the screen: swipe right to go to home screen; swipe left to go to camera.

### 2) Navigation Keys

On the bottom left corner of the screen, you will find three navigation soft keys.

**Back:** The back button brings you to the previous screen you were on. Once you have been on the home screen, the button will not take you back any further

**Home:** Bring you back to the home screen

**Recent apps:** Displays a list of recently used apps. To open a previous app, touch it. To remove the app from the list, swipe from left or right

After a short time without getting used, these buttons may shrink to dots or fade away, depending on the current app. To bring them back, touch their location.

At the left top of the screen, you will see an icon "Google", you can tap it for searching on Google quickly

**All Apps icon:** On the right bottom of the screen, you will see Status icons, it will tell you which apps have sent you notifications; for example, that a message has arrived, or your device has connected with PC

To see your notifications, swipe your finger up from the right bottom of the screen.

**System icon:** on the right corner of the screen display the current wifi network, connection strength, time, brightness, volume, battery and more

### 3) Touch & Type

Use your fingers to manipulate icons, buttons, menus, the onscreen keyboard, and other items on the touch screen. You can also change the screen's orientation.

To select or activate something, touch it.

To type something, such as a name, password, or search terms, just touch where you want to type.

A keytablet pops up that lets you type into the field. Other common gestures include:

**Touch & hold:** Touch &hold an item on the screen by touching it and not lifting your finger until an action occurs

**Drag:** Touch &hold an item for a moment and then, without lifting your finger, move your finger on the screen until you reach the target position. For example, you can drag to reposition shortcuts on the Home screen

**Swipe or slide:** Quickly move your finger across the surface of the screen, without pausing when you first touch (so you don't drag something instead). For example, you can slide a Home screen left or right to view the other Home screens.

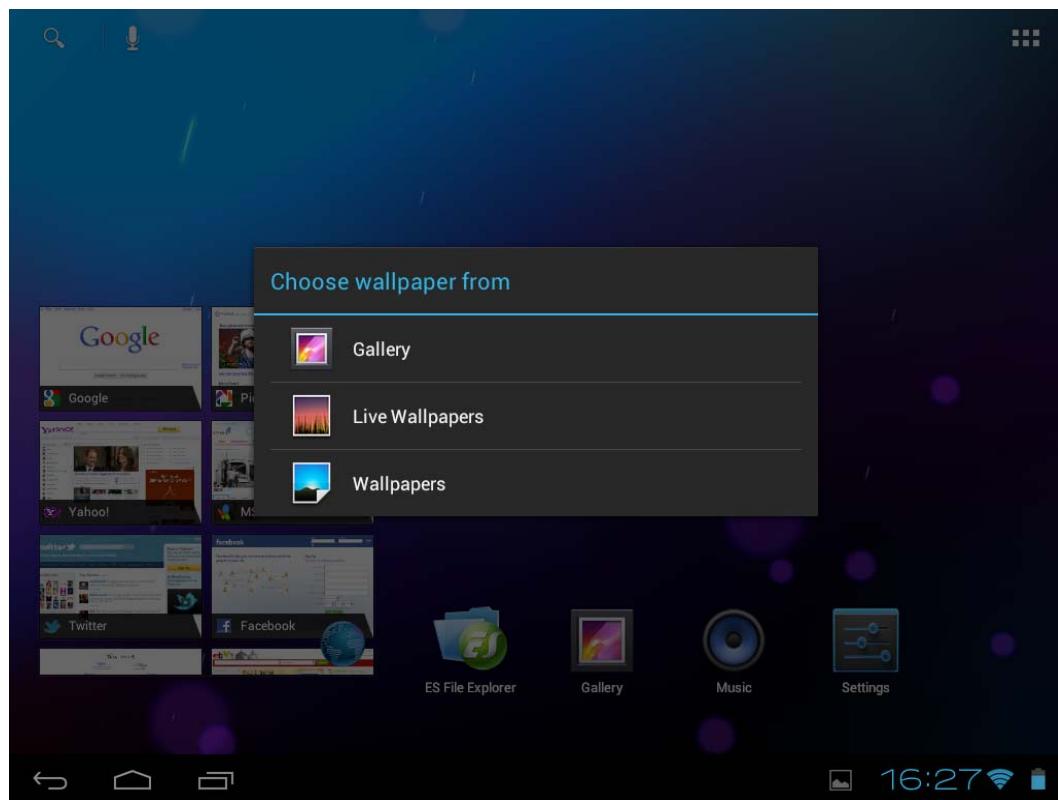

**Double-tap:** Tap quickly twice on a webpage, map, or other screen to zoom. For example, double tap a webpage in Browser to zoom in, and double-tap again to zoom out.

**Pinch:** In some apps (such as Maps, Browser, and Gallery), you can zoom in and out by placing two fingers on the screen at once and pinching them together (to zoom out) or spreading them apart (to zoom in).

## 4) Change default wallpaper

Wallpapers are images from Gallery (pictures synced from Picasa, and so on), still images included with the system, and live images (such as an animation or a map that centers on your location). They take the place of the default background for your Home screens.

1. Touch &hold anywhere on a Home screen that's not occupied. A list of options appears.

2. Touch a wallpaper source:

**Gallery:** Choose from pictures that you've taken with Camera or downloaded to your device.

**Live Wallpapers:** Choose from a scrolling list of animated wallpapers.

**Wallpapers:** Choose from thumbnails of default images, or touch a thumbnail for a larger version

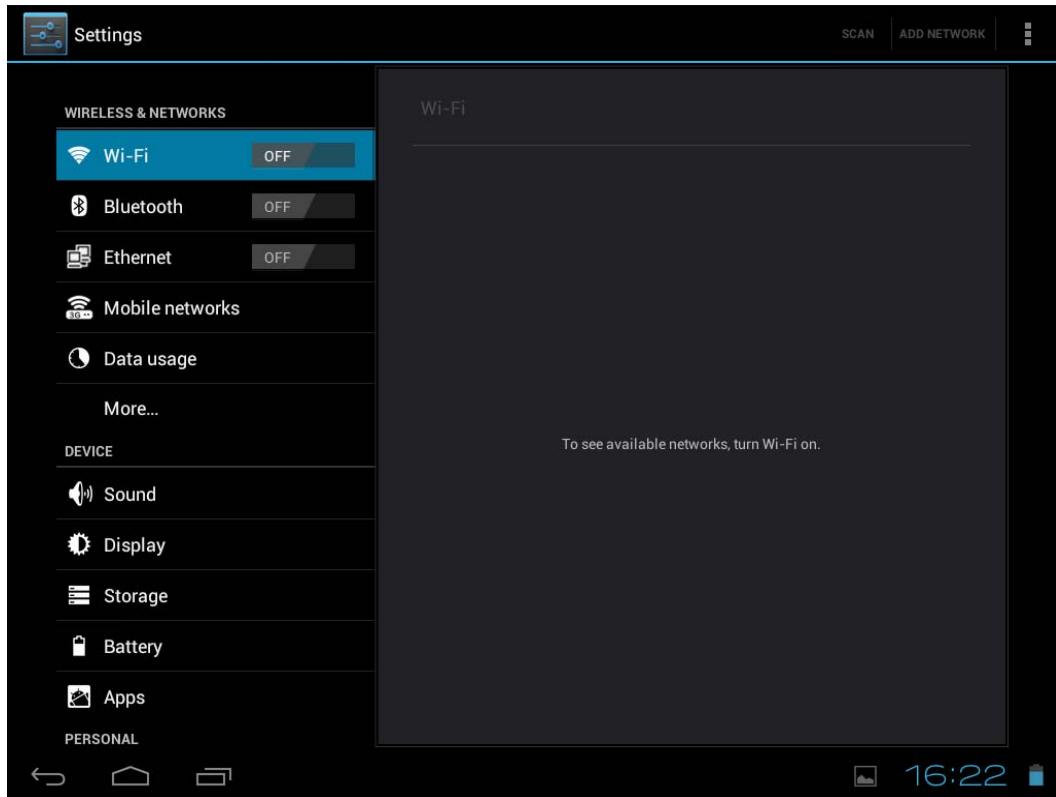

You can download additional wallpapers from Android Market.

3. To set a wallpaper, touch Set wallpaper at the top of the screen (for Gallery images).

## 5) Settings

Touch the Settings icon on App screen, you will see the following screen where you could setup your device's settings.

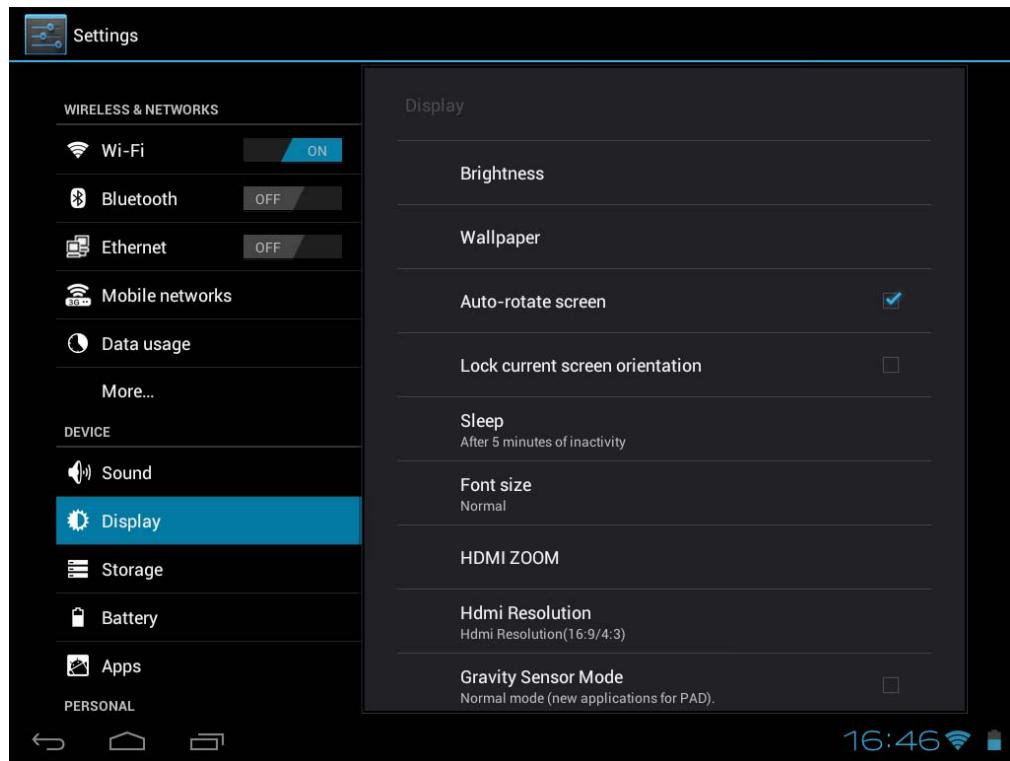

In the Settings screen here are many options you can setup, for example turn on/off Wi-Fi network, adjust the sound of the device and manage the apps in your device.

1 .Wi-Fi: you will see the visible networks on the right window, you can touch it and enter the correct password to access the Internet.

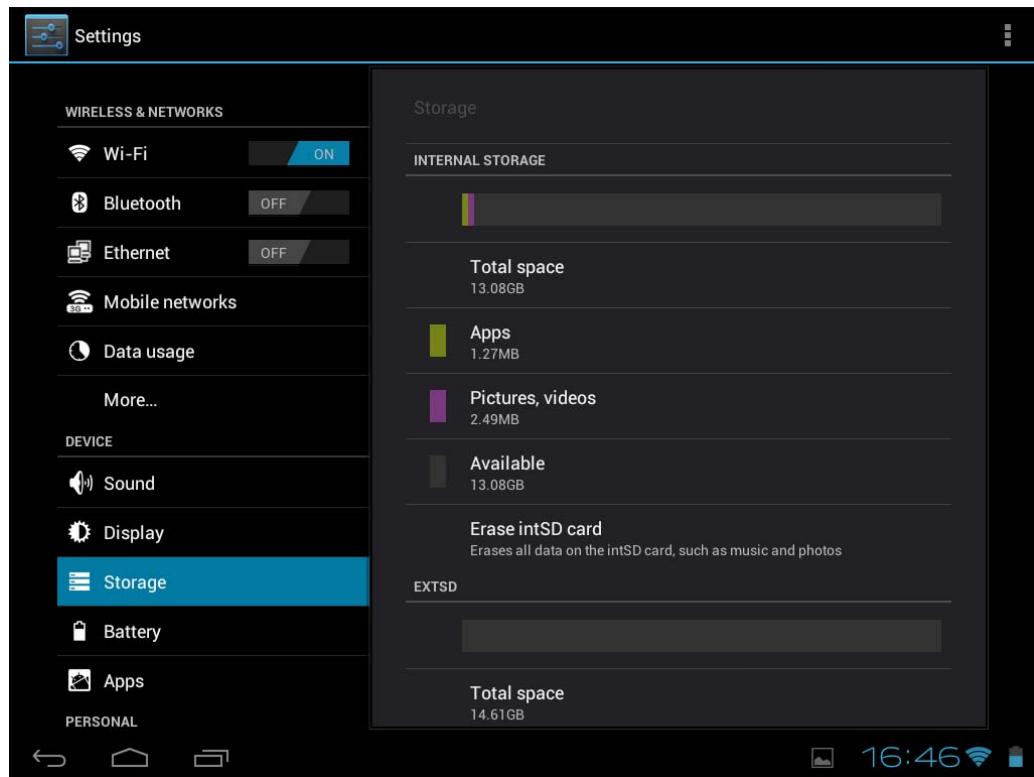

2. Sound: in this function, you can adjust the volume for your device.

3. Display: after you touch the "Display", then you can adjust the brightness on the right window and also you can change wall paper, and so on.

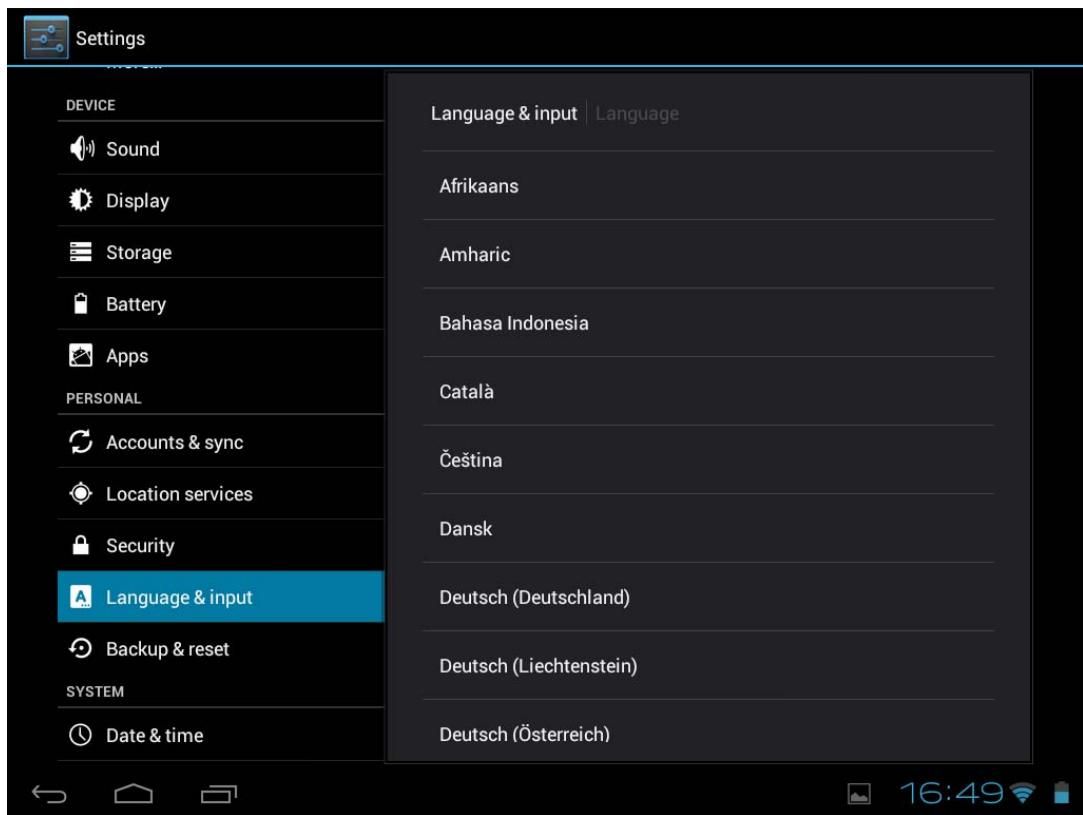

4. Storage: touch it to check the information of the storage.

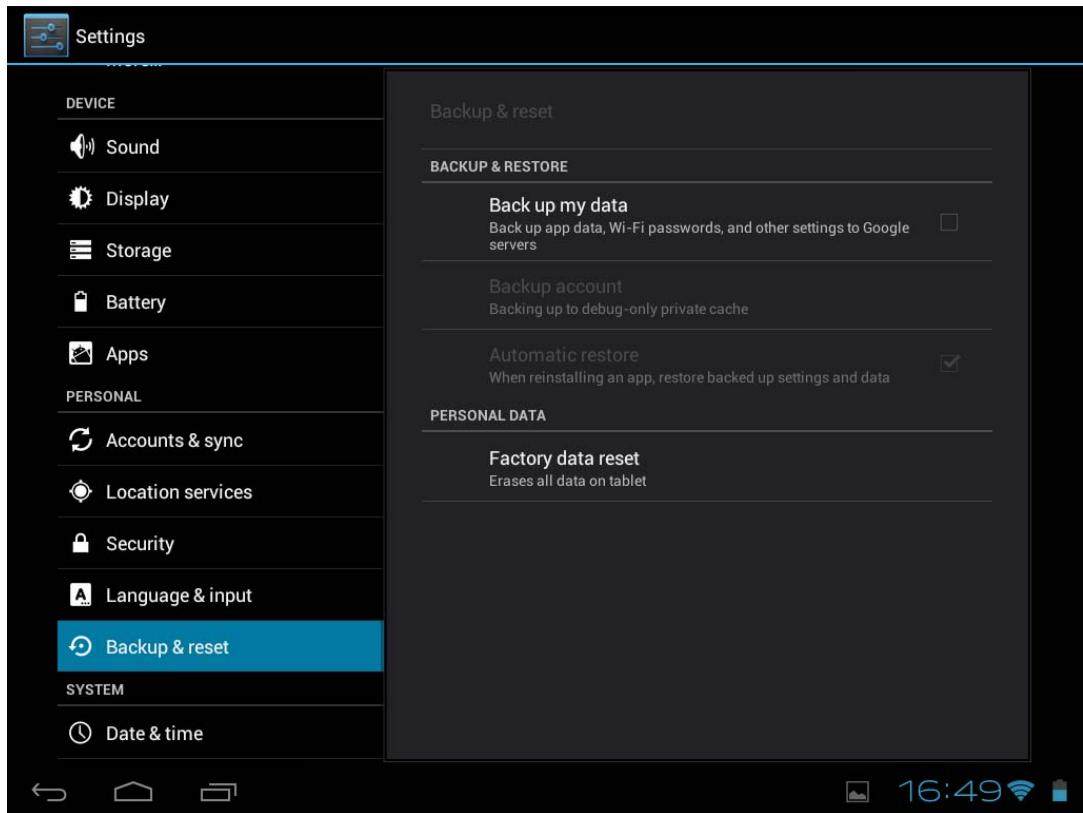

5. Apps: touch it you will see all the installed apps shows on the right window, and you can tap anyone of them to uninstall it or clean data for that app.

6. Language &input: touch it you can change your device's language and input method.

7. Backup &reset: this can help you recover all the data in your device

8. Date &time: you can setup your device's time information here.

## 6) Connect to networks & devices

### Connect to wifi networks

To use Wi-Fi, you connect to a wireless access point, or "hotspot." Some hotspots are open and you can simply connect to them. Others implement security features that require other steps to set up, such as digital certificates or other ways to ensure that only authorized users can connect.

To extend the life of your battery between charges, turn off Wi-Fi when you're not using it. You can also set your device to disconnect automatically from Wi-Fi networks when it's sleeping.

Turn Wi-Fi on and connect to a Wi-Fi network

If you're adding a Wi-Fi network when first setting up your device, Wi-Fi is turned on automatically.

1 Touch the Settings icon on a Home or All Apps screen.

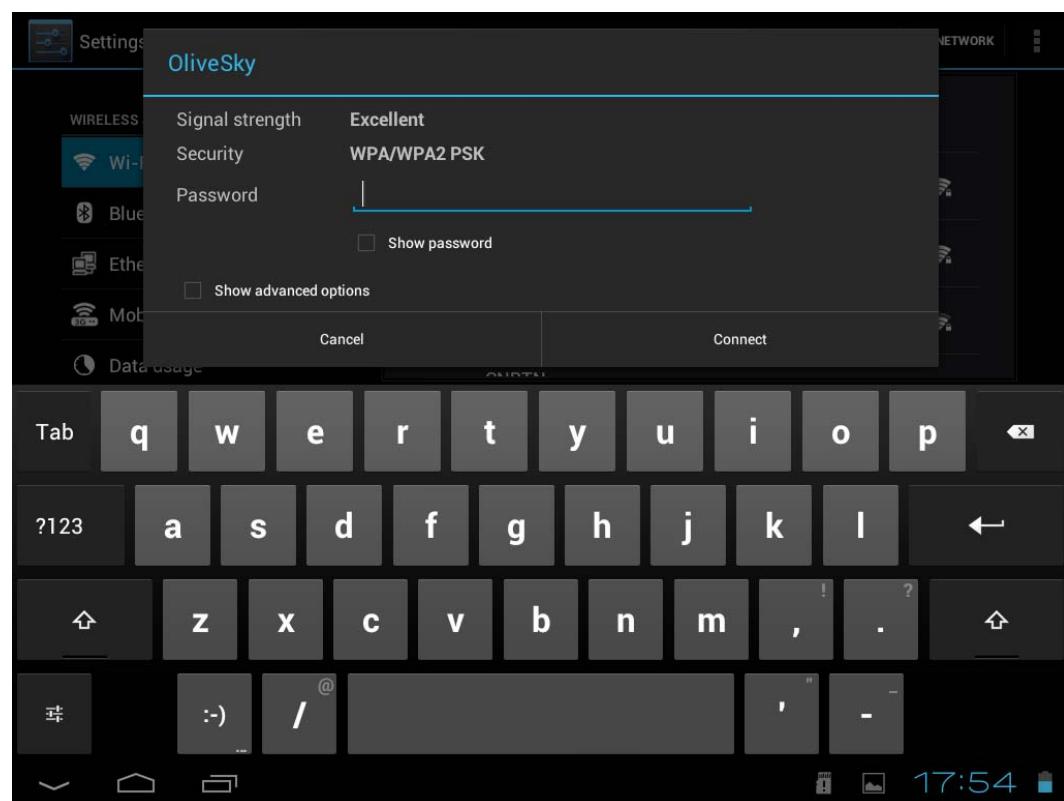

2 Touch Wireless & networks /Wi-Fi.

3 Slide the Wi-Fi switch to the On position.

The device scans for available Wi-Fi networks and displays the names of those it finds. Secured networks are indicated with a Lock icon. If the device finds a network that you connected to previously, it connects to it.

4 Touch a network name to see more details or connect to it.

If the network is secured, you're prompted to enter a password or other credentials. (Ask your network administrator for details.)

## Connect to Bluetooth devices

Bluetooth is a short-range wireless communications technology used to communicate between devices over a distance of about 8 meters. The most common Bluetooth devices are headsets for making calls or listening to music, hands-free kits for cars, and other portable devices, including laptops.

To connect to a Bluetooth device, you must turn on your device's Bluetooth radio. The first time you use a new Bluetooth device, you must "pair" it with, so that both devices know how to connect securely to each other. After that, they connect automatically.

To extend the life of your battery between charges, turn off Bluetooth when you're not using it. You may also be required to turn Bluetooth off in some locations. Bluetooth is turned off when you switch to Airplane mode.

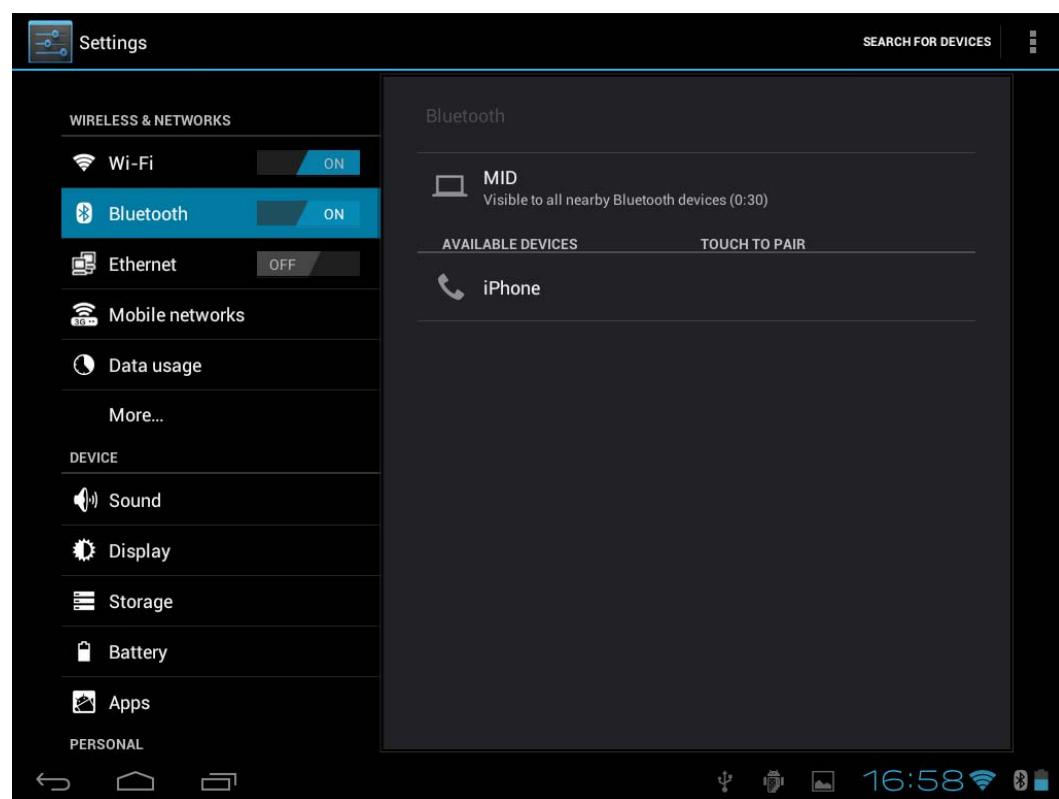

System bar icons indicate Bluetooth status.

Turn Bluetooth on or off

1 Touch the Settings icon on a Home or All Apps screen.

2 Touch Wireless & networks.

3 Slide the Bluetooth switch on or off.

## Change your device's Bluetooth name

Your device has a generic Bluetooth name by default, which is visible to other Bluetooth devices when you connect them. You can change the name so that it is more recognizable.

1 Under Settings > Wireless & networks, make sure Bluetooth is turned on.

2 Touch Bluetooth.

3 In the Bluetooth screen, touch the Menu icon and choose Rename.

4 Type a new name and touch Rename.

Pair your device with a Bluetooth device

You must pair your device with a device before you can connect to it. Once you pair your device with a device, they stay paired unless you unpair them.

1 Under Settings > Wireless & networks, make sure Bluetooth is turned on.

2 Touch Bluetooth. Your device scans for and displays the IDs of all available Bluetooth devices in range.

If the device you want to pair with isn't in the list, ensure that the it's turned on and set to be discoverable.

See the documentation that came with your device to learn how to make it discoverable.

3 If your device stops scanning before your Bluetooth device is ready, touch Search for devices.

4 Touch the ID of the Bluetooth device in the list to pair with it.

Follow the instructions to complete the pairing. If you're prompted to enter a password, try entering 0000 or 1234 (the most common passwords), or consult the documentation that came with the device. If the pairing is successful, your device connects to the device.

## 7) Manage Apps

To see all your apps, touch the All Apps icon  on any Home screen

The main All Apps screen opens. This is where you can see all your apps, including those downloaded from Android Market. You can move app icons to any of your Home screens.

From All Apps, you can

**Move between screens:** Swipe left or right.

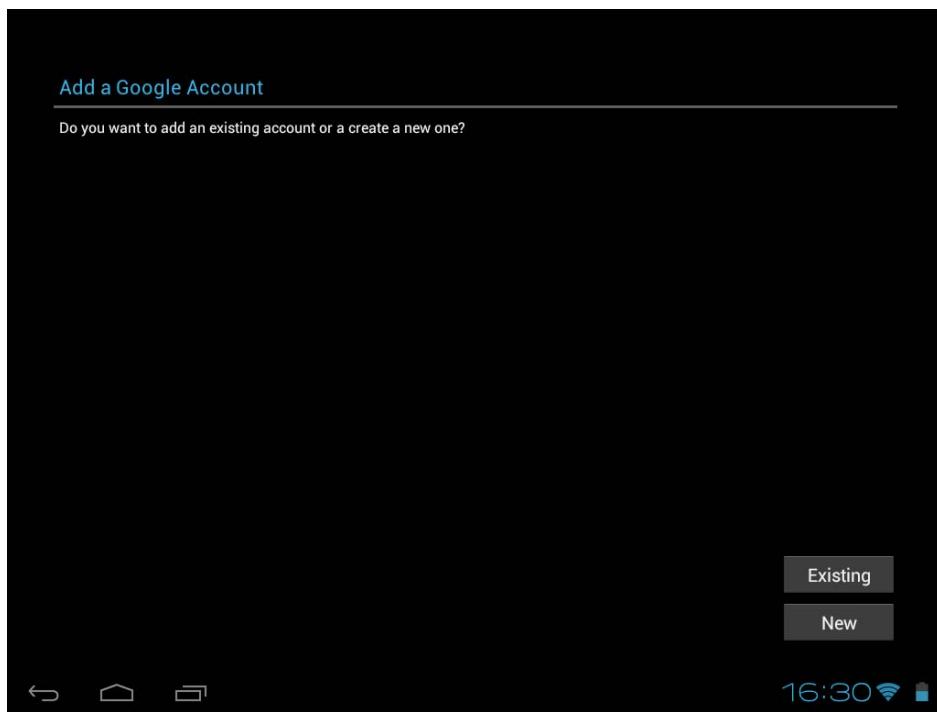

**Launch an app:** Touch its icon.

**Place an app icon on a Home screen:** Touch &hold the app icon, slide your finger, and lift your finger to drop the icon in place.

**Place an app icon in the Favorites tray:** Touch, hold &slide to move one of the Favorites icons out of the tray. Then use the same technique to move another one into the same position.

**Explore your widgets:** Touch the Widgets tab at the top of any All Apps screen.

**Get more apps:** Touch the Market icon.

To remove an app icon from the Home screen, touch and hold it, slide your finger toward the top of the screen, and drop the app over the Remove icon.

## 8) Add widgets

Widgets are like windows into your apps. They're available from an All Apps tab for you to move onto your Home screens.

To see your widgets:

1. Touch the All Apps icon  on your Home screen.

2. Touch Widgets at the top of the screen.

From the main Widgets screen, you can

**Move between screens:** Swipe left or right.

**Drag a widget to a Home screen:** Touch and hold the widget's icon, slide your finger where you want to place it, and lift your finger.

You may be asked to make further choices before the widget activates. If there isn't room where you dropped it, the widget won't get added to the Home screen.

## 9) Manage notifications

Notifications report the arrival of new messages, calendar events, and alarms, as well as ongoing events. When you receive a notification, its icon appears in the top left corner of the screen. Depending on your Sound settings, you may also hear a sound.

See your notifications: Swipe your finger down from the top of the screen.

Respond to a notification: Touch it.

Dismiss a notification: Swipe it sideways.

Dismiss all notifications: Touch the X in the top right corner.

## 10) Try some apps

### Browsing internet via wifi

Click Browser app  on App screen, input the website you want to surf. You could also find some popular websites in the bookmark.

## Camera

Choose Camera app  on App screen(or by the unlock screen), you could shoot wonderful photos or videos. Share them freely with your friends via wifi network.

## Start Gmail

You can use the Gmail app  to read and write emails from your device. All your gmails are always up to date and available no matter where you connect from.

## Manage your Calendar

The Calendar app lets you view and edit your schedule.

When you first set up your device, you configured it to use an existing Google Account (such as Gmail), or you created a new one. The first time you open the Calendar application on your device, it displays any existing calendar events from that Google Account on the web. As you edit events from any mobile device or web browser, they are synced automatically across all the places you need them.

To view your Calendar, touch on a Home or App screen.

To change the Calendar view, touch the date at the top and choose Day, Week, Month, or Agenda. Swipe to scroll vertically or horizontally. In the Day or Week views, spread your fingers apart or pinch them together to zoom in or out.

From any of these views, you can

**Read or edit event details:** Touch an event to view its details.

**Manage events and calendars:** Touch icons across the top or Menu to search or create events, return to today, or adjust settings.

## Gallery

The Gallery app is a window that you can view your photos and videos here.

Touch the Gallery icon on App screen, then you will see a picture wall shows on your screen, you can tap the picture or video to view it.

## Manage files on your device

The ES File Explorer app manages all the files in your device and Micro SD card

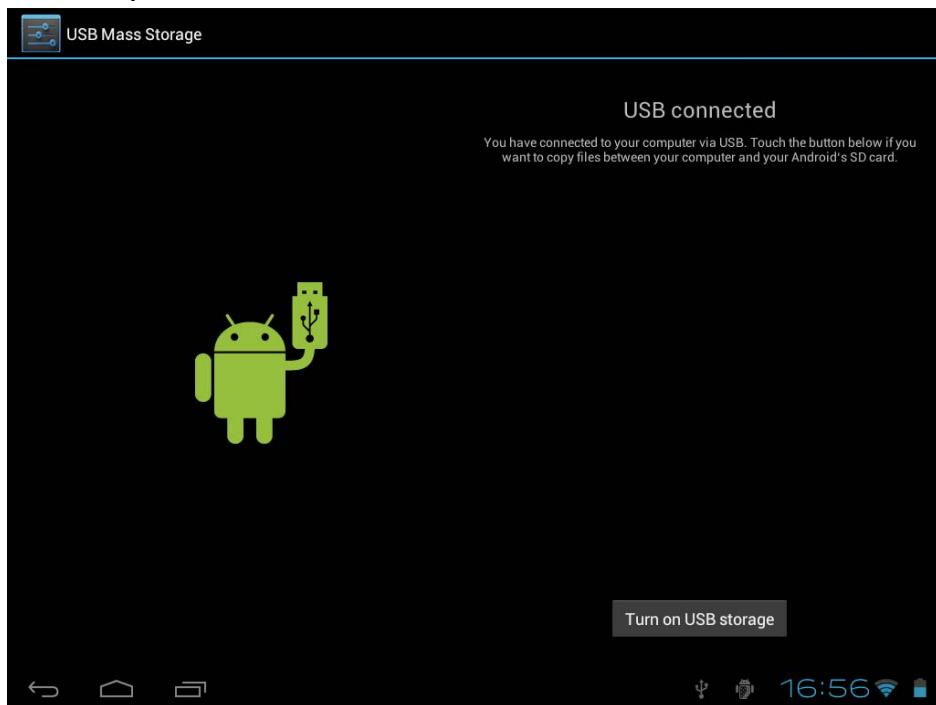

Touch the search icon will help you get the file that you want very quickly.

## 11) USB Connection

Transfer files between your device and pc

1. Connect your device and PC via USB cable
2. Click USB icon  in the right bottom of your device
3. Click “USB Connected”
4. Click “Turn on USB storage” and now your device has been connected to your pc successfully.

## **FCC Warning**

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

NOTE 1: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

NOTE 2: Any changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
