The image shows an Agilent MXA signal analyzer, a piece of electronic test equipment. It is a large, light-colored device with a screen on the left and a control panel on the right. The screen displays a frequency spectrum plot with a yellow background and a blue line representing the signal. A prominent peak is visible in the spectrum. The control panel features a large rotary knob, several buttons, and a small display. A small electronic circuit board is connected to the analyzer via a ribbon cable. The board has a blue LED that is lit up. The entire setup is placed on a white surface.
