

# EXPLOSIVE VIEW

# HIGH SPEED RACING INSTRUCTION MANUAL

## CAUTION

### BEFORE DRIVING

- Read the manual with parent or guardian(responsible adult).
- Check the range of your radio operation.
- Make sure that all screws and nuts are properly tightened.
- Always use fresh battery for transmitter and receiver to avoid losing control the model.
- Make sure that no one else is using the same radio frequency as you are using, if you cannot control your car, stop driving immediately.
- Check the neutral trigger position.

### DURING RUNNING

- Do not run on a public street. This could cause accidents, personal injuries and/or property damage.
- Do not run near pedestrians or small children.
- Do not run in small or confined areas.

### AFTER RUNNING

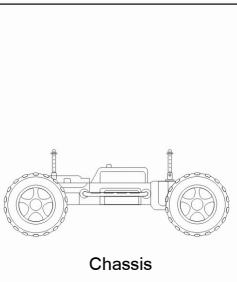

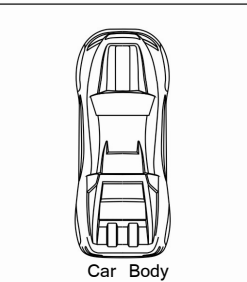

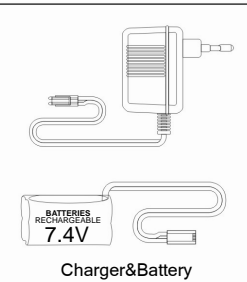

- Disconnect the car battery pack before switching off the transmitter. This will prevent the car from losing control.

### BATTERY SAFETY

- Be careful when handling the battery pack. It will be not after running.  
If the wire is frayed or worn, a short circuit can cause a fire or burn.
- Non-rechargeable batteries are to be recharged.
- Rechargeable batteries are to be removed from the toy before being charged.
- Rechargeable batteries are only to be charged under adult supervision.
- Different types of batteries or new and used batteries are not to be mixed.
- Only batteries of the same or equivalent type as recommended are to be used.

## OVERVIEW

### KIT CONTENTS

# START UP GUIDE

## CHARGING THE BATTERY PACK

Always use the included charger for the included battery pack. Do not use any other packs. Charging time for an empty pack is about 4 hours. Do not charge the battery pack longer than 4 hours to avoid overheating and battery damage.

Battery

Charger

Make sure charger jack fully inserted

Charging time

4 hours!

### CAUTIONS

This charger can be used only for the battery pack included in the kit. Do not charge the battery pack for longer than 4 hours. Overcharging generates excessive heat and will damage the battery pack. Use the charger with adult supervision. Do not use the charger near water or when wet. Do not use the charger if the wire is frayed or worn. If the wire is frayed or worn, a short circuit can cause a fire or burn.

### After the first time charging the battery pack

Charging time for an empty pack is 4 hours. If you are sure about the battery level, empty the battery pack for 4 hours. If you are not sure about the battery level, empty the battery pack by driving the R/C car before charging the battery pack.

## PREPARING THE CHASSIS

Installation the R/C car body, and A fixed body with pins(3pcs)

1

Open the battery compartment lid.

2

Remove the battery compartment lid.

3

4 Make sure charger jack fully inserted.

Battery installation is complete.

5

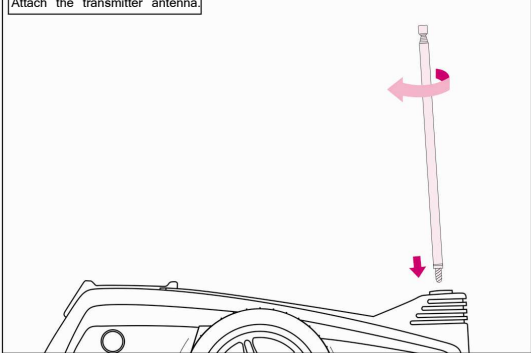

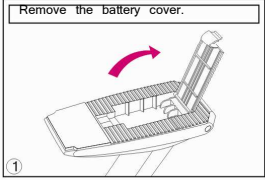

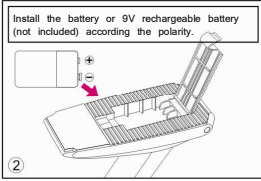

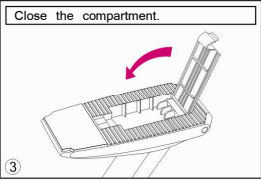

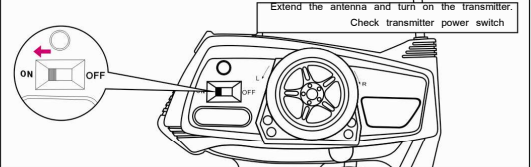

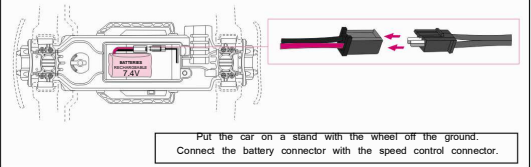

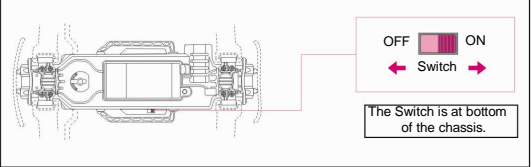

# OPERATION

## TRANSMITTER OPERATION

Band Selector(A,B,C,D)

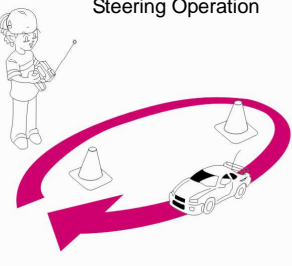

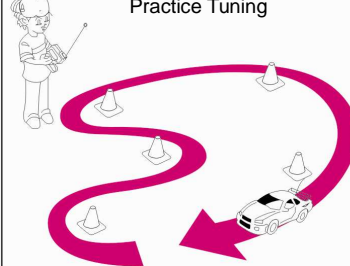

PREPARING THE TRANSMITTER	CHECK OPERATION
<p>Attach the transmitter antenna.</p>  <p>Remove the battery cover.</p>  <p>1</p> <p>Install the battery or 9V rechargeable battery (not included) according to the polarity.</p>  <p>2</p> <p>Close the compartment.</p>  <p>3</p>	<p>Checking Transmitter</p>  <p>Extend the antenna and turn on the transmitter. Check transmitter power switch.</p> <p>Checking Battery</p>  <p>Put the car on a stand with the wheel off the ground. Connect the battery connector with the speed control connector.</p> <p>Checking Switch</p>  <p>OFF ON ← Switch → The Switch is at bottom of the chassis.</p> <p>Checking Radio Range</p> <p>Make sure no one else is using the same radio frequency as you are using. Check the radio system and range before every driving session. To properly check the range, have a friend hold the truck and walk to the farthest distance that you plan to operate your model. Operate the controls to make sure the model responds correctly. Do not operate the model if there is any problem with radio system. If you switch on the R/C car first before the transmitter, you may lose control of the R/C car.</p>

## ▲ Do not drive the car in the following DRIVING CAUTIONS

<p>With the high performance motor and battery, the car is capable of running very fast. Follow the cautions below and drive the car in a very large space especially until you get the feel of driving the car.</p>	 <p>Do not drive the car on public streets or highways. This could cause serious accidents, personal injuries, and/or property damage.</p>	 <p>Do not drive the car in water or sand or on a carpet. This could damage the car.</p>	 <p>Make sure everyone is using different frequencies when driving together in the same area.</p>
--	---	--	--

## DRIVE SLOWLY IN THE BEGINNING!

<p>Acceleration</p>  <p>Max speed</p>  <p>Slow down</p>  <p>If you fully pull the throttle trigger on the transmitter, the car will run very fast and become difficult to control. Drive slowly until you become used to driving the car. Pull the throttle trigger slowly and gradually, and the car will move forward slowly. Release the throttle trigger to operate the brake, and the car will stop.</p> <p>Brake</p>  <p>Stop (Neutral)</p>  <p>Reverse</p> 	<p>Steering Operation</p> 	<p>Practice Tuning</p>

**Warning:** Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

**NOTE:** This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- ☐ Reorient or relocate the receiving antenna.
- ☐ Increase the separation between the equipment and receiver.
- ☐ Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- ☐ Consult the dealer or an experienced radio/TV technician for help.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) this device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.
