p. Wi-Fi Network Settings

Since many functions require Wi-Fi connection, please configure the Wi-Fi network before operation.

1. Click  → Wireless and Network
2. Select to turn on Wi-Fi.

The device will automatically scan and list all available Wi-Fi networks. If the Wi-Fi connection has  icon, you need to enter the valid password.

3. Tap a Wi-Fi connection → if password is required, please enter the valid password → tap Connect, and the  icon appears on the desktop after connecting to Wi-Fi network.

4. Tap  to return to the desktop.

If you set to hide Wi-Fi, it won't be scanned automatically. Please tap Add Wi-Fi Network and then enter corresponding information to add the Wi-Fi.

q. Connect to Bluetooth Devices

1. Slide the Bluetooth switch on.
2. Tablet scans for and displays the IDs of all available Bluetooth devices in range.
3. Touch the ID of the Bluetooth device in the list to pair with it. When prompted to enter a pass code, try 0000 or 1234 (the most common pass codes), or consult the documentation that came with the device.
4. If the pairing is successful, tablet will connect to the device.

System bar icons indicate Bluetooth status. 

Bluetooth is turned off when switched to Airplane mode.

8. Expand Storage

1. USB Flash Drive

Connect one end of the OTG cable to the flash drive and the other end to the USB OTG interface of the device. You can use the flash drive when it is ready.

❖ *Do not insert/remove the USB flash drive frequently or else it may damage the flash drive.*

2. Micro SD Card Usage

❖ *The device supports memory card of up to 32GB.*

Insert the memory card into the slot, press with fingers to clamp it, the screen will show Preparing SD card, and the Micro SD card is ready for use when the characters disappear. You can operate when the card is ready.

Removing Micro SD/TF Card

Close all programs or files opened from the memory card. Tap  → T F card and device memory → Remove TF card. Press the card and it will eject.

❖ *Do not insert/remove the memory card repeatedly or else it may damage the card.*

❖ *Please use qualified memory card to avoid incompatibility.*

9. Installing Programs/Uninstalling the Application

❖ You can install the purchased or downloaded Android applications quickly through the Google Play store or by doing the following: 

1. Copy desired .apk files to SD card or USB storage device → insert the card into the device or connect USB flash drive to the device.

2. Tap the file manager icon 

3. Tap  or  and find the folder that save .apk files

4. Select an .apk file → Install. After the application is installed, the icon will appear in the interface that shows all applications.

5. Tap to run the application directly or tap OK to return to the File Manager interface.

Downloading Applications From Internet Directly

You can download Android applications from the internet directly and install in the device quickly.

1. Click the Play Store icon  to connect to the internet.

2. Enter the URL and tap the download link of desired application

3. After downloading, tap and hold the downloaded files (in download log interface), → click Open → Install

Connecting to PC to Save Files

1. Connect the table PC to PC and the tablet PC can be used as mobile storage device. To connect to PC, connect one end of the USB cable to the USB OTG interface of the table PC and the other end of the USB interface of PC.
2. After connected, the tablet PC will prompt , click the  icon and then select Turn on USB storage to transmit data between PC and tablet PC, as show below:

Uninstalling the Application

You can uninstall the Android application quickly.

1. Tap Menu key → **Settings** → **Application** → **Manage Applications**.
2. Tap an application → **Uninstall**.
3. Tap OK to uninstall

Charging the Device

Connect one end of the power adapter to the socket and the other end of the power jack to charge the device.

During charging, the battery symbol is , after charged, the battery symbol turns into .

- ❖ You can use USB cable to charge the device
- ❖ You can use the device while charging, however it will extend the charging time
- ❖ Use the device at least once every week.
- ❖ Charge the battery regularly
- ❖ Do not keep the battery too low for long time.

NOTE:

When you use this device, please follow the safety notice below to prevent fire, electric shock and injury.

- ✓ Keep the device away from rain and moisture.
- ✓ Keep the device away from direct sunlight and heat source.
- ✓ Protect the power cord. When connecting the power cord, do not step onto it or place any object on it which may cause extrusion. Protect the connector of the power cord connected to the device especially.
- ✓ Please use the original power adapter for charging. Non-conforming charges may cause harm.
- ✓ Do not disassemble the shell or repair it without authorization
- ✓ Handle the screen gently. To clear the fingerprints or dust on the screen, use soft cloth dedicated for camera lens instead of gauze.

Guarantee Card:

For after sales service, Please write down the contact details of you and the Retailer whom unit was purchased from:

FCC STATEMENT :

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) This device must accept any interference received, including interference that may cause undesired operation.

Warning: Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B

digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.

- Increase the separation between the equipment and receiver.

- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

- Consult the dealer or an experienced radio/TV technician for help.

Specific Absorption Rate (SAR) information:

This Tablet PC meets the government's requirements for exposure to radio waves. The guidelines are based on standards that were developed by independent scientific organizations through periodic and thorough evaluation of scientific studies. The standards include a substantial safety margin designed to assure the safety of all persons regardless of age or health.

FCC RF Exposure Information and Statement The SAR limit of USA (FCC) is 1.6W/kg averaged over one gram of tissue. Device types: NEXTab 9 M920 (FCC ID: 2AATJ-M920) has also been tested

against this SAR limit. The highest SAR value reported under this standard during product certification for use at the body is 0.62W/kg. This device was tested for typical body-worn operations with the back of the handset kept 0cm from the body. To maintain compliance with FCC RF exposure requirements, use accessories that maintain a 0cm separation distance between the user's body and the back of the handset. The use of belt clips, holsters and similar accessories should not contain metallic components in its assembly. The use of accessories that do not satisfy these requirements may not comply with FCC RF exposure requirements, and should be avoided.
