Applicant/Grantee AUDIOPIPE HONGKONG LTD										
FCC ID) :	2AATW-2013	30813AP							
	Section 15.212 Modular Transmitters									
Request	for Modular	Approval	Reg	uest for Limited Modular Approval						
-		Requirements	-	EUT Conditions	Comply (Y/N)					
				Approval Requirements	Compty (1711)					
1	The radio ele	ements of the m		There is no shielding on the module, so						
_	transmitter must have their own shielding. The physical crystal and tuning capacitors may be located external to the shielded radio elements.			this is a LMA submission. Please refer to	N					
				User Manual for the restricted condition						
				to the OEM integrator.						
				to the OLIVI integrator.						
2	The modular transmitter must have			Buffered Data input stage has been						
_	buffered modulation/data inputs (if such inputs are provided) to ensure that the module will comply with Part 15 requirements under conditions of excessive data rates or over-modulation.			integrated in chip(IS1684S).						
				integrated in emp(1510015).	Y					
					•					
3	The modular transmitter must have its			DC 3.3V power supply regulated by IC	Y					
		supply regulation		24C32	•					
4		transmitter mu		EUT is equipped with a PCB antenna,

	the case of the	ne module and	supporting							

	equipment. Any accessories, peripherals,		
	or support equipment connected to the		
	module during testing shall be		
	unmodified and commercially available		
	(see Section 15.31(i)).		
6	The modular transmitter must be	The instruction on the labeling rule of	
0		The instruction on the labeling rule of	
	equipped with either a permanently	the end product has been stated in the	
	affixed label or must be capable of	user manual of this module, please also	
	electronically displaying its FCC	see the exhibition label sample.	
	identification number.		
	(A) If using a permanently affixed label, the		
	modular transmitter must be labeled with its own		Y
	FCC identification number, and, if the FCC identification number is not visible when the		
	module is installed inside another device, then		
	the outside of the device into which the module is		
	installed must also display a label referring to		
	the enclosed module. This exterior label can use		
	wording such as the following: "Contains		
	Transmitter Module FCC ID: "2AATW- 20130813AP" or "Contains FCC ID: "2AATW-		
	20130813AP or Contains FCC ID: 2AA1W- 20130813AP" Any similar wording		
	that expresses the same meaning may be used.		
	The Grantee may either provide such a label, an		
	example of which must be included in the		
	application for equipment		
	authorization, or, must provide adequate		
	instructions along with the module which explain		
	this requirement. In the latter case, a copy of these instructions must be included in the		
	application for equipment authorization.		
	(B) If the modular transmitter uses an electronic		
	display of the FCC identification number, the		
	information must be readily accessible and		
	visible on the modular transmitter or on the		
	device in which it is installed. If the module is		
	installed inside another device, then the outside of the device into which the module is installed		
	must display a label referring to the enclosed		
	module. This exterior label can use wording such		
	as the following:		
	"Contains FCC certified transmitter module(s)."		
	Any similar wording that expresses the same		
	meaning may be used. The user manual must include instructions on how to access the		
	electronic display. A copy of these instructions		
	must be included in the application for		
	equipment authorization.		
7	The modular transmitter must comply	The required FCC rule has been fulfilled	
	with any specific rules or operating	and all the instruction for maintaining	
	requirements that	compliance has been clearly stated in the	
	ordinarily apply to a complete	user manual.	
	transmitter and the manufacturer must		Y
	provide adequate instructions along with		
	the module to explain any such		
	requirements. A copy of these		
	instructions must be included in the		
	application for equipment authorization.		

8	The modular transmitter must comply with any applicable RF exposure requirements in its final configuration.	The maximum conducted output power of this module is +2dBm(Typical) with antenna gain 2.0dBi only, therefore this module comply with SAR exemption threshold according to KDB447498 V05	Y
		V05.	

A **limited modular approval** may be granted for single or split modular transmitters that do not comply with all of the above requirements, *e.g.*, shielding, minimum signaling amplitude, buffered modulation/data inputs, or power supply regulation, if the manufacturer can demonstrate by alternative means in the application for equipment authorization that the modular transmitter meets all the applicable Part 15 requirements under the operating conditions in which the transmitter will be used. Limited modular approval also may be granted in those instances where compliance with RF exposure rules is demonstrated only for particular product configurations. The applicant for certification must state how control of the end product into which the module will be installed will be maintained such that full compliance of the end product is always ensured.
