

WIDTV1 Silkscreen & Labels

The above photo shows the WIDTV1 module with the new “audiovox mobiletv” logo. The logo is attached to the original e-mail and contained within a zip file. The size of the logo is approximately 85% of the size of the actual logo, the rough dimensions are 8.2mm high by 18.76 wide. The width dimension does not include the registered logo, ®.

At this time, the pantone color for the silkscreen has not been determined. As soon as it is available, we will advise the appropriate pantone color for the logo.

The new logo shall be placed in the same location as the “meron by Siano” logo.

Please confirm that the information on the bottom of the label shown on the right (e.g. FCC Info, Audiovox Logo, Model #, etc.) will be silkscreened on the Bottom Panel of the WIDTV1 device. Also confirm that the Audiovox 18-dgiti Serial Number Label and MAC Address will be applied to the bottom of the WIDTV1 via a label.
