**Difference Explanation** 

The company's applications for FCC certification of the 2.4GHz

Remote Control models include:

OVO-RC08P2,OVO-RC08,OVO-RC07P,OVO-RC08P;

The difference between these models is listed as below: the models are

different because of the sales channels and customer code numbers; but

their internal structure, circuit principle, and all key components related

to electromagnetic compatibility are exactly the same. The difference

does not affect the safety and electromagnetic compatibility of the

product.
