RE: Applicant: JADAK LLC, FCC ID: 2AAVI-JDK1901, Request for  
supercede installation manual.

Customer has updated the wording in their installation manual and would like to  
supercede the previous version. Please see below for changes:

- Previous version: "There should be no metallic surfaces placed in front of the unit."
- Revised Version: "There should be no metallic surfaces placed in front of the antenna (Note: the antenna encircles the optical lens)."

Thank you,  
Eileen Yang
