Re: FCC ID: 2AB8BARX200

To Whom It May Concern:

The following application is submitted on behalf of our client, AirNetix, LLC, for evaluation of their model ARX-200 for certification under FCC Part 15.247.

The ARX-200 is an AiRocks Wireless Audio Repeater that operates in the frequency range of 2402.5 to 2477.5 MHz. The ARX-200 is a component of the AiRocks Pro digital wireless audio system and is used to transport audio from a single source to multiple powered speakers within its range. The audio repeater is enclosed in a weather resistant enclosure and includes a sealed pushbutton front panel interface with an LCD display, allowing it to be deployed in both indoor and outdoor venues where the wide area of audio distribution is required.

The ARX-200 was tested in full to the requirements of the aforementioned rules and was found to be in compliance.

Sincerely,

A handwritten signature in black ink that reads 'R. Sam Wismer'. The signature is written in a cursive, flowing style.
