## **Preface.:**

Mobile phone users dear, thank you for your purchase of the mobile phone

The use of the mobile phone will bring you a hitherto unknown surprise experience: the mobile phone support dual GSM card and dual standby function, Colorful, let you in memory. Professional MP3 music player, the MP4 image on the full range of multimedia sharing, whole body comfortable  
Install

## **a memory card**

Your mobile phone supports T-Flash memory card, insert a memory card, you can browse, copy the file operation on the storage card by mobile phone, mobile phone storage space can be expanded.

Remove the rear cover and battery, according to the direction of the open storage card that Kakage;  
The memory card with gold contacts side down, card the narrow end first into the card slot until the card slot, and fully consistent, close the card to complete the installation.

## **The start-up and shutdown**

### **Boot**

Press and hold the button hang up about three seconds boot.

### **Shutdown**

Press and hold the button hang up about three seconds off.

## **Dial telephone**

### **Direct dial**

The standby mode, press the keyboard area, enter the area code and telephone number

According to (dial 1) chose to use the card 1 call, or choose to use the card 2 call.

### **Use the mail list call**

Enter mail list, to find the information you need to record.

Call press dial key.

### **Redial recently dialed telephone number**

Entering the main menu, select [call records), select a phone number to dial.

### **Answer or reject the call**

#### **Answer the call**

A call, press the answer button

#### **Answer second calls**

If the mobile phone a call waiting, when you call second call in mobile phone prompt, you can:

Press the answer key to answer a second call, then before the call set automatically to maintain the status

Press the hang up button to reject second calls to the call.

### **Rejecting calls**

A call, press the hang up button refuse to answer.

### **In call menu**

During a call, select Options > < menu can make the following options operation:

**Preserve:** keep the current call, can be carried out in second groups.

**End to end the current phone call:** single line.

**Main menu:** into the main menu.

**Recording:** call recording.

**Mute:** the temporary closure of the microphone during a call. Quiet, you can hear each other's voices, but the other party can not hear your voice. Restoration calls selection (unmute) can restore.

**Volume:** during a call, you can adjust the speaker volume

## **Information**

The establishment of information: SMS edit Writing

**In box:** storing the received information.

**Draft:** a draft information storage.

**Outbox:** out of the sending information in the outbox.

## **Video camera**

**Video camera:** can take pictures and videos in the preview screen, press the navigation key switch photographic or video

## **Music Player**

After starting to play music, choose to store music files in mobile phone or T-Flash player, in the settings menu can also customize the shuffle, repeat single player, all repeat and background play.

## **File management**

Edit to memory card folder.

**In the file management, press the [options], you can perform the following operations:**

**Open:** open the folder.

**The new folder:** in the selected folder directory to the new folder.

**Rename:** to rename the folder.

**Delete:** delete the selected file or folder.

## **Scene mode**

Standard mode, silent mode, the meeting mode, outdoor mode, you can set the switch machine ringing, ringing, ringing tone, manner, information adjust the ring volume etc..

## **Set up**

Mode: you can choose to use a single SIM or dual SIM card.

**Flash light:**Click into the flashlight on or long press the OK key to open

**Mobile phone settings:** enter the menu can be set the time and date, machine, the default language, input method, phonetic, standby menu.

**Network settings:** choose network

**Security settings:** for mobile phone lock, boot need to enter a password to boot (the default password: 1122)

**Notification settings:** open the notification service, receive information popup remind.

**Restore factory settings:** return to factory settings. (Code: 1122)

## **Call center**

**Call records:** to view have been broadcast telephone, received calls, the missed call records.

**Call settings:** call waiting, call forwarding, call restriction requires network support; in the advanced

settings can also be opened automatically replay, IP dialing, call time reminder, answer mode, you can set according to their own needs.

## **The telephone book**

Save contacts to the phone book. The main interface can choose the phone book contact call, send SMS , IP dialing, edit, copy, delete, mark, group setting where you can add group, the phone can view the storage state thin set menu, copy, move, delete all contacts.

## **Entertainment**

The machine has a single puzzle game.

## **Multi-media**

**Mobile TV:** Enter the mobile TV, you can search a clear platform for viewing

**Video camera:** can take pictures and videos in the preview screen, press the navigation key switch photographic or video.

**Album:** to view photos and downloaded to the mobile phone in the picture.

**Video:** video player supports AVI, 3gp, MP4 format video playback.

**Mobile phone movie:** the video file to download to the T-Flash card under the "Movie" folder, video format support avi, 3gp, mp4.

FCC Caution: Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. This device and its antenna(s) must not be co-located or operating in conjunction with any other antenna or transmitter.

NOTE: The manufacturer is not responsible for any radio or TV interference caused by unauthorized modifications to this equipment.

Such modifications could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC

Rules.

These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment

generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause

harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the

equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

#### FCC RF Exposure Information and Statement

The SAR limit of USA (FCC) is 1.6 W/kg averaged over one gram of tissue. Device types: TANK T191 (FCC ID: **2AB9NGENIOTANKRDA**) has also been tested against this SAR limit. The highest SAR value reported under this standard during product certification for use at the ear is 0.758W/kg and when properly worn on the body is 0.849W/kg. This device was tested

for typical body-worn operations with the back of the handset kept 5 mm from the body. To maintain compliance with FCC RF exposure requirements, use accessories that maintain a 1.5cm separation distance between the user's body and the back of the handset. The use of belt clips, holsters and similar accessories should not contain metallic components in its assembly.

The use of accessories that do not satisfy these requirements may not comply with FCC RF exposure requirements, and should be avoided

This device was tested for typical body-worn operations. To comply with RF exposure requirements, a minimum separation distance of **5 mm** must be maintained between the user's body and the handset, including the antenna. Third-party belt-clips, holsters, and similar accessories used by this device should not contain any metallic components. Body-worn accessories that do not meet these requirements may not comply with RF exposure requirements and should be avoided. Use only the supplied or an approved antenna.
