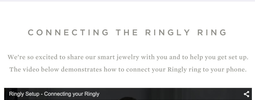
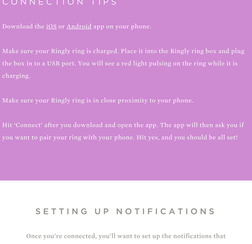
WELCOME.
LET'S GET STARTED.

Thank you for purchasing a Ringly ring. Check out our videos and quick connection tips to help set up your ring.



CONNECTING THE RINGLY RING

We're so excited to share our smart jewelry with you and to help you get set up. The video below demonstrates how to connect your Ringly ring to your phone.



CONNECTION TIPS

Download the iOS or Android app on your phone.

Make sure your Ringly ring is charged. Place it into the Ringly ring box and plog the box in to a USB port. You will see a red light pulsing on the ring while it is charging.

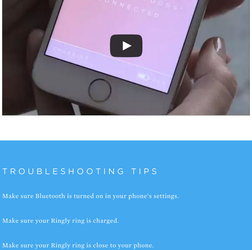
Make sure your Ringly ring is in close proximity to your phone.

Hit 'Connect' after you download and open the app. The app will then ask you if you want to pair your ring with your phone. Hit yes, and you should be all set!

SETTING UP NOTIFICATIONS

Once you're connected, you'll want to set up the notifications that get sent to your ring.

Have fun picking your notification color and vibration patterns!



NOTIFICATION TIPS

Swipe across a notification to change the color of that notification.

Tap the dots on the right to select one of 4 vibration patterns.

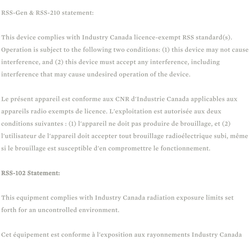
Hit 'Edit' in the top right to turn different notifications on and off.

Make sure you remember what color and vibration corresponds to which notification.

Make sure notifications are turned ON in your phone's settings for apps whose notifications you want sent to your ring. Their alert setting needs to be on Banners or Alerts as well.

TROUBLESHOOTING

Can't seem to get your Ringly ring to connect? We're here to help. Watch our video below to learn what to do when things go wrong.



TROUBLESHOOTING TIPS

Make sure Bluetooth is turned on in your phone's settings.

Make sure your Ringly ring is charged.

Make sure your Ringly ring is close to your phone.

If things are still not working, disconnect the Ringly ring in the Profile settings in the Ringly app and follow the steps to clear the connection between the ring and the phone.

FCC

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

- Warning: Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
-
- This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
  - Reorient or relocate the receiving antenna.
  - Increase the separation between the equipment and receiver.
  - Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
  - Consult the dealer or an experienced radio/TV technician for help.

IC

RSS-Gen & RSS-210 statement:

This device complies with Industry Canada licence-exempt RSS standard(s). Operation is subject to the following two conditions: (1) this device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of the device.

Le présent appareil est conforme aux CNR d'Industrie Canada applicables aux appareils radio exempts de licence. L'exploitation est autorisée aux deux conditions suivantes : (1) l'appareil ne doit pas produire de brouillage, et (2) l'utilisateur de l'appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d'en compromettre le fonctionnement.

RSS-102 Statement:

This equipment complies with Industry Canada radiation exposure limits set forth for an uncontrolled environment.

Cet équipement est conforme à l'exposition aux rayonnements Industry Canada limites établies pour un environnement non contrôlé.
