PRODUCT FEATURE

This karaoke player operates on Android operating system, so it has owned all features with respect to Android operating system. It is not only a HDD karaoke player with HDMI, but also a product which has transcended the limitations of players. Actually, it is an intelligent computer system. By enabling the unit to access to Internet, users can download and install various APK applications from Android application store. And it also provides interfaces to camera, mouse, keyboard and other peripherals to support Internet surfing, chat, e-mail, webpage view, television, news visit, HD movies, photos, music, games, remote monitoring, timing & reminding, as well as interaction with PC and mobile phone. Additionally, users can also make full use of their imagination to explore the potential of the unit as it is really a professional device integrating KTV, HD smart TV box and Android computer.

Performance Parameters:

1. Video Output Resolution:

HDMI: 720P, 1080P Full HD
YPbPr: 720P, 1080P Full HD
CVBS: 480*720, 576*720

2. Video format: AVI(H.264,DIVX,DIVX,XVID), rm,rmvb,MKV(H.264,DIVX,DIVX, XVID),WMV,MOV,MP4(H.264,MPEG,DIVX,XVID),DAT(VCD),VOB(DVD), PMP,MPEG,MPG,FLV(H.263,H.264),ASF,TS,TP,3GP etc.

3. Audio format: Support MP3,AC-3,WMA,MP2,OGG,AAC,M4A,MA4,FLAC,APE,3GP,WAV

4. Picture format: JPG,BMP,PNG,GIF, Support the resolution up to 4096*4096.

5. Support a built-in hard drive with SATA interface, and support NTFS/FAT32 format partition with the maximum capacity of 2TB. Support GPT format with the capacity of over 3TB maximum 16TB (Formatted by windows 7/Vista)

6. Built-in WIFI and LAN network interface provide easy access to Internet.

7. Android 4. 0 operating system.

Description of Main Functions:

a).Karaoke Function:

- Have over 100,000 songs to choose from.
- The menu supports UNICODE fronts and can display the language of many countries, including English, Chinese, Traditional Chinese, Spanish, Japanese, Korean, Thai, Vietnamese, Russian, Khmer, Myanmar, Indonesia etc.
- Support for switching the Multi-audio-track of VOB/AVI/MKV file.
- This product has an easy-to-use intuitive graphical user-interface that has such features as Reserved, Insert, Replay, Inquire, Search, Favorite, Ranking etc.
- Support a variety of ways to select songs: selected by number/by Singer/by words/by language/by spelling.
- Powerful songlist management feature: The software and tool from the original manufacturer make it easy for you to create and edit the songlist.txt file.
- 3 ways for adding songs: 1) Connect the computer with Mini USB port, add songs into the hard drive of the unit by computer, and then edit the songlist.txt 2) Produce songs in the computer first, then COPY the song files into U Disk or Portable Hard Drive, then insert the U Disk or Portable Hard Drive into the HOST USB port of the unit, operate the remote control to add the songs into the unit automatically. 3) add songs from VCD/DVD disc.

(Note: For Type I, II karaoke player, there is no ADD SONGS function with DVD-ROM.)

ACCESSORIES LIST

- Users can customize the KTV menu option so as to easily program the menu interface used for own operating habits.
- Can display score with cheering and applause after each song is finished playing so as to enhance entertainment effects
(Note: Type I only has auto SCORE, can't display real SCORE, or can be externally connected).
- The function of INSERT COIN with active mode or passive mode can meet the customers for commercial purposes.
- Random playback function.
- Favorite function, User can collect favorite songs.
- The built-in microphone echo makes it easy for users to plug the microphone directly for singing. (Note: Type I does not have this function.)
- Build-in L/R audio output with auto volume control function. (AGC/AVC)
- The extended remote control IR interface supports externally connecting a remote control IR receiver with the remote control keyboard.
- Users can download lemon KTV client applications from "Apple Store" or "Google Play" and install these applications in iPhone/android mobile phones. Through running these applications, users can connect their mobile phones to the karaoke player via WIFI to control the playback/selection songs of the karaoke player with mobile phones

b). HD Multimedia Playback Function:

With HD Multimedia Playback Function, users can use the remote control (or mouse) to directly browse the movies and music which are stored in hard disk drive, U disk, mobile HDD, DVD, SD card.

c). Photo Browser:

Through the photo browser, users can use the remote control to directly browse the photos/pictures which are stored in hard drive, U disk, mobile HDD, DVD, SD card.

d). Internet Web Browser:

Through the web browser, users can use the remote control to simulate mouse events or use wireless fly mouse, to click on or directly visit website pages.

e). Android Home Theater Personal Computer (HTPC):

By connecting USB mouse and keyboard, users can search android applications through Internet and install these applications onto the desktop to perform various features such as gaming, social networking, video monitoring, reading, search and interaction with mobile phones.

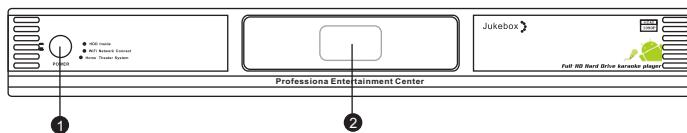

B. ACCESSORIES LIST

1.USB2.0 connection cable	1pcs
2.AV cable	1pcs
3.HDMI cable	1pcs
4.WiFi antenna	1pcs
5.Remote Control	1pcs
6.Manual of user	1pcs
7.The screws use for hard drive	4pcs
8.CD/DVD disc (with system files & software tools & demo songs)	1pcs

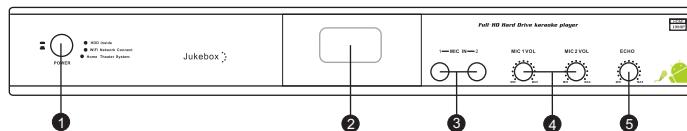

INPUT & OUTPUT PORT FUNCTION.

C. INPUT & OUTPUT PORT FUNCTION.

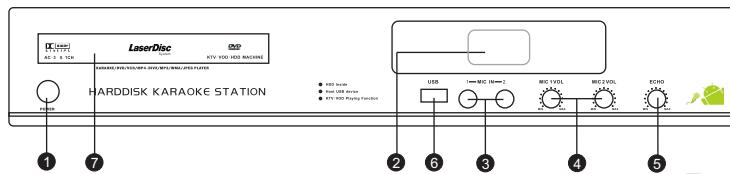

Front:

Type I

Type II

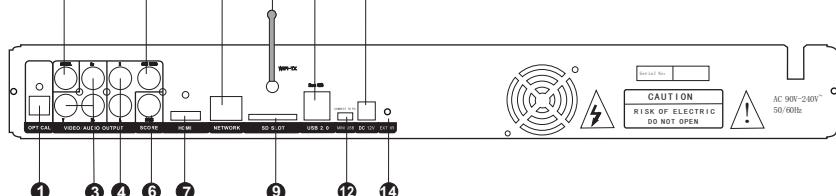

Type III

- 1. Power On /Off
- 2. IR ,LED Display Window
- 3. Mic In
- 4. Mic.Volume Control

- 5. Mic.Echo Control
- 6. USB slot
- 7. DVD-ROM

Rear Panel:

- 6. Score Signal Input, can connect with MIC amplifier
- 7. HDMI Output (HDTV)
- 8. Lan network port

- 9. SD Card Socket
- 10. WIFI antenna
- 11. USB 2. 0 Socket
- 12. Mini USB Socket
- 13. COIN Control I/O port, Service Lamp
- 14. External IR sensor, receive signal port.

INSTALLATION OF KARAOKE SYSTEM

D. INSTALLATION OF KARAOKE SYSTEM :

- To ensure the karaoke player works normally, please put a hard disk drive in the unit and install the system files in the hard disk drive.
- If your karaoke player contains hard disk drive with songs library, it means the system has been installed in the hard drive, then do not need to read this page before using all the functions of the unit directly.
- If your karaoke player does not contain any hard disk drive, please use the CD disc in the package accompanied with the unit and follow the steps as follows to set up the system:
 - 1) Connect the hard drive with computer, run the /Software_tools/format_tool/EPMSSetup.exe file in CD accompanied with the unit, and split the hard drive into one partition (only one) and format the hard drive as NTFS or FAT32 with Primary (not Logical). (If your hard drive in excess of 3TB, please format it as GPT partition in Windows 7/Vista, from **computer->manage-> to computer management** window, convert to GPT and format and partition with NTFS file system)
 - 2) The CD disc contains system files and DEMO songs, so please copy all the folders and files into the hard drive completely.
 - 3) Screw off the screw and open the cover of the karaoke player cabinet, then you will see a yellow label marked "HARD DISK LOCATION". Please use the special screw in the package accompanied with the unit to fix the hard drive to the specified location, and then make sure the connected line is well plugged.
 - 4) Once everything is OK, connect the HDMI port of the unit with HD television, turn on the television and the karaoke player, the boot screen with the words of "Lemon KTV" will appear on the television screen, and finally Launcher screen will be displayed on the television:

5) Press the direction keys on the remote control and select [karaoke] icon to enter the KTV application mode. Once 00000 is displayed in the middle of the screen, press the <MENU> key on the remote control, then the song menu will appear on the screen, which means the unit is operating in KTV mode, so the system has been successfully boot. Then you can select some DEMO songs as a test (For the serial number of DEMO songs, please read README.TXT in the CD disc).

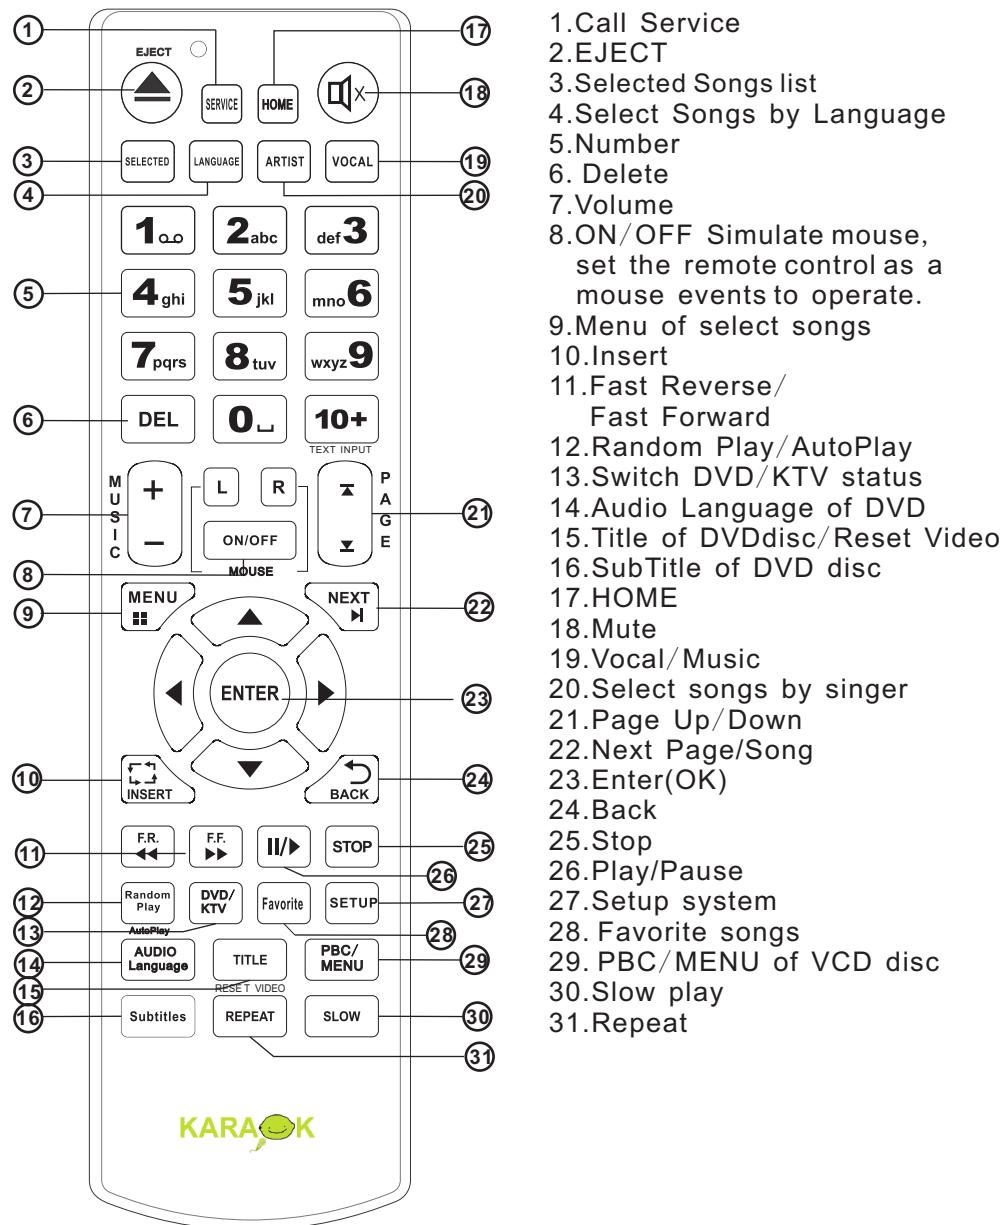

6) When the system works normally, please follow "How to Add Songs" in this manual if you wish to add your own songs library to the unit. Then you can enjoy the fun of singing.

(To maintain the HDD karaoke player, a computer is generally a must for completing the management of the song files, so it is essential to have a basic knowledge of computer operation.)

FUNCTION OF REMOTE CONTROL

E. OPERATION OF KARAOKE PLAYER

1. Function of Remote Control:

OPERATION OF KARAOKE SYSTEM

2. Operation of Karaoke System :

In the Launcher screen, you can select [Karaoke] icon to enter the KTV system.

TECHNICAL SPECIFICATIONS

F. TECHNICAL SPECIFICATIONS FOR KARAOKE SYSTEM

1. Basic Principles of HDD Karaoke Player:

1) There is a songlist.txt file in /KTV_SYS/ folder in the hard drive of the karaoke player, which is a text file in UNICODE format. All the information including song's name/serial number/singer/language is saved in this file. The karaoke player selects the songs for playing based on this file. For file rule, see the detailed description below.

2) Song number is from 00001 to 99999, which is composed of five numbers, these numbers represent the folder name (/00/~99/) and song file name (000.xxx~999.xxx) in the hard drive. For example: there is a song file name 006.AVI in the /03/ folder, so the corresponding song number is 03006.

3) When you select a song with menu, the unit will search the song's serial number in songlist.txt, then it will locate the corresponding song file in the hard drive by the serial number to playback.

4) When you select a song by serial number, the unit will search the song corresponding to this serial number in songlist.txt. If the song is located, the unit will display the song name on the screen, and play the corresponding song file in the hard drive. If the song can't be located, the unit will play the song file corresponding the serial number in the hard drive directly.

2. Description of File System

Folder	Definition	Description
00~99	000.xxx~999. xxx The folder with song files	The song files will be placed in each folder and named using 000 to 999. The song serial number is composed of five numbers. For example: if the song serial number is 63006, the unit will point to the 006.xxx song file in /63/ folder.
99	000.xxx~999. xxx Background Video files	The MTV song files or video clip files will be placed in this folder as MENU background to playback circularly.
KTV_SYS	SYSTEM FILES	Include the files necessary for normal operation of the unit.
	Songlist.txt	All the information with respect to songs is saved in the songlist.txt file. The karaoke player locates and selects the songs based on this file.
	KTVMENU*. ini	For the configuration file of MENU, users can define MENU options by themselves.
	SonglistManager. exe	The software tool to edit the songlist.txt, should operate on computer.
	/Background/Background*. png	Pictures as background of MENU.
	/ico/***. png	The picture files as MENU icon of karaoke player
	/Logo/logo***. *	The intro video files of logo.
	/Mobile_ico/***. png	The picture files as MENU icon of mobile KTV app.
	/Singer/***. jpg	The photo files of singer.
	/Score/***. mp3	Play the applause sound when scoring.
Software Tools	/Batch_rename_tool/	It can be installed in the computer to batch change the song file name.
	/CDG_to_AVI/	Used for convert CD-G disc to AVI file.
	/DVD_Decrypter/	Grab the VOB file from DVD disc to hard drive.
	/Format_HardDisk/	Tool to format the large-capacity hard drive.
	/Encrypt_Songs/	The tool of encrypt the song files.
	/Edit_songlist/	The tool of edit the songlist.txt file.
	/Android_apps/	The installation APK files of Android application.

TECHNICAL SPECIFICATIONS

3. The Format Of Song File:

***.AVI	MPEG4 format	Support high definition video
***.MPG	MPEG1/2 H264 format	Support high definition video
***.DAT	VCD format	
***.VOB	DVD format	Multi-audio-track
***.WMA	WMA audio format	File size smaller than MP3
***.Mp3	MPEG_3 audio format	
***.MKV	MKV format	Support high definition video

4. Rule of electron Songlist.txt:

Songlist is a songlist.txt (UNICODE) file in the /UNI_SYS/ folder of the hard drive. One line represents a song, and there are 13 semicolons in each line, which are used to define the information of the song. The definition rule is shown as follows:

MY BONNIE;1;Twins Le;2;5;8;MB;65269;TL;2;10;STAR BAY;SB;TwinsLe

(1) Song's name
