1.5 Test Modes

This device has been tested below conditions:

[Test Mode #1]

Frequency	Charging current	Note
110 kHz	1 A	Low Frequency, Max. Load
157.5 kHz	650 mA	Middle Frequency, Medium Load
205 kHz	250 mA	High Frequency, Min. Load

This device has been tested with the various resistors to simulate the various load conditions of the client device. The charging current was controlled from 250 mA (Min.) to 1 A (Max.) using the resistors and three types of Jig board with circular coil.

- 1) EUT has a range of the operating frequency from 110 kHz to 205 kHz and It has a range of the output current from 250 mA to 1 A when output voltage is DC 5 V.
- 2) If the operating frequency is 110 kHz, the maximum output current is 1 A and If the operating frequency is 205 kHz, the minimum output current is 250 mA.

- 3) To the simulation of the power transmission in from 110 kHz to 205 kHz. In the full range of the operating frequency, Normal operating condition, the test frequency is three which are the High, Middle and Low frequency of 110 kHz, 157.5 kHz and 205 kHz.
- 4) In order to operate EUT in three operating frequencies, three types of Test Jig were used.
- 5) The Wireless Charging Cover was used as Test Jig is actually used with the EUT.
- 6) The EUT to operate at a steady-state output current, the Wireless Charging Cover was not to combined with a smart phone. The DC output of the Wireless Charging Cover was connected to the resistor. As follows, the three types of Test Jig was prepared and tested.
- 7) Test Jig #1
Operating Frequency : 110 kHz, Output Voltage : DC 5 V, Output Current : 1 A
Calculation of resistor value : $I = \frac{V}{R}$, $1 A = \frac{5V}{R}$, $R = \frac{5V}{1A}$, $R \approx 5 \Omega$
- 8) Test Jig #2
Operating Frequency : 157.5 kHz, Output Voltage : DC 5 V, Output Current : 0.625 A

Support Equipment	Battery status	Note
Mobile Phone	< 1%	Max. Load
Mobile Phone	50 %	Medium Load

Note : The Charging is not operation when 100% fully charged status.

This device has been tested with the Mobile phone.

Mobile phone is on WWAN communicating. (**Worst Case : GPRS Class 10 2 Tx**)
WWAN communication was implemented using CMU200(Radio Communication Tester).

Mobile phone's battery status was checked by display battery percentage function.

1.6 Calibration Details of Equipment Used for Measurement

Test equipment and test accessories are calibrated on regular basis. The maximum time between calibrations is one year or what is recommended by the manufacturer, whichever is less. All test equipment calibrations are traceable to the Korea Research Institute of Standards and Science (KRISS), therefore, all test data recorded in this report is traceable to KRISS.

Anechoic Chamber

Measurement distance information

Measurement distance = 10 cm

From EUT edge to the center of probe.

Measurements should be made from all sides and the top of the primary/client pair, with the 10 cm measured from the center of the probe(s) to the edge of the device.

2.2 Radio frequency radiation exposure limits

§ 1.1310 The criteria listed in table 1 shall be used to evaluate the environmental impact of human exposure to radiofrequency(RF) radiation as specified in § 1.1307(b), except in the case of portable devices which shall be evaluated according to the provisions of § 2.1093 of this chapter.

NOTE 1 TO TABLE 1: Occupational/controlled limits apply in situations in which persons are exposed as a consequence of their employment provided those persons are fully aware of the potential for exposure and can exercise control over their exposure. Limits for occupational/controlled exposure also apply in situations when an individual is transient through a location where occupational/controlled limits apply provided he or she is made aware of the potential for exposure.

NOTE 2 TO TABLE 1: General population/uncontrolled exposures apply in situations in which the general public may be exposed, or in which persons that are exposed as a consequence of their employment may not be fully aware of the potential for exposure or can not exercise control over their exposure.
