## Office of Engineering and Technology

### **Inquiry on 02/05/2014 :**

#### **Inquiry:**

Seeking guidance for wireless chargers : Attached

### **FCC response on 02/06/2014**

Please review KDB 680106 D01 and clarify if the EUT meets all the criteria outlined in Section 5(2) of this publication. KDB 680106 D01 is linked below.

<http://appsint.fcc.gov/kdb/GetAttachment.html?id=gDJO4az8eyw84%2BguyjPd%2Bw%3D%3D>

---Reply from Customer on 02/18/2014---

Attached operational description and RF Exposure test report.

Please check and reply.

Thanks.

### **FCC response on 02/18/2014**

Based upon the information provided, this device would not meet the criteria described under KDB 680106 D01 Paragraph 5(2) due to the maximum coupling surface area being less than 60cm<sup>2</sup>. Due to this, an RF exposure evaluation must be reviewed and accepted through a KDB or PBA inquiry to enable authorization of the device. The report submitted partially meets these criteria. However, field measurements are not shown from all sides/top as discussed in Paragraph 3(3) of said KDB publication. Please ensure that the submitted test results are in accordance with Paragraph 3(3) of KDB 680106 D01.

---Reply from Customer on 02/19/2014---

Attached RF Exposure test report update. (Page 9 and Page 11)

(Measurements was made from all sides and the top of the primary/client pair, with the 10 cm measured from the center of the probe(s) to the edge of the device.

The highest emission level was recorded.)

Please check and reply.

Thanks.

### **FCC response on 02/19/2014**

Based upon the information provided, this EUT may be processed according to normal procedures by a TCB, if certification is required; or a recognized laboratory, if Declaration of Conformity is appropriate.
