

The Rehabilitation Institute of Chicago
maintains control of the module
model: CCDB110.

It will not be sold as a stand-alone device,
but will be installed into their CC110 and CC110-LTI
controllers for use with powered prostheses.

No users' manual is provided for the module itself.

Date: August 8, 2014

Dear Application Examiner,

This letter is to certify the following for module CCDB110:

- 1) RIC will maintain control of the module being placed within the two (2) host devices.
- 2) The word "Contains" will be placed before the FCCID on the host device labels.

Please contact me if you have any further questions. Thank you for your attention to this matter.

Regards,

Thomas Idstein
