Re: Request for Confidentiality of Trial Stimulator, FCC ID: 2ABU84300

Dear Sir or Madam:

Permanent Confidentiality

Algostim, LLC ("Algostim") hereby requests that the Federal Communications Commission ("FCC") withhold permanently from public review certain portions of Algostim's application for certification with FCC identifier 2ABU84300. Public disclosure of these portions of the application would not only provide Algostim's competitors significant competitive advantages in developing similar products, but it would disclose successful implementation of unpublished, leading edge technology developed by us.

This request for confidentiality is made pursuant to 47 CFR 0.457(d)(2) and 0.459 of the FCC's rules. Algostim requests that the following documents, submitted in connection with its application for certification with FCC identifier 2ABU84300, be kept permanently confidential:

1. Schematics
2. Block Diagram
3. Internal Photos
4. Operational Description
5. Tune-Up Procedure

The materials listed above contain technical data, which would customarily be guarded from competitors. In addition, Algostim is requesting that the internal photos within the application be granted confidentiality, because only personnel authorized by Algostim have access to this information. The Trial Stimulator, which is the subject of Algostim's application for certification, is provided to patients by the physician after their procedure. Information regarding internal photos is not released to the public, the Trial Stimulator cannot be obtained by the public, and any parties with access to this information are required to sign a non-disclosure agreement. As such, the internal photos are highly confidential business information that could convey trade secrets pertaining to manufacturing and design techniques.

We understand that internal photos are not routinely held confidential, but may be eligible for confidentiality in the following circumstances: 'internal photos of a non-consumer device may be held confidential if the device is not accessible to the general public'. We request that the internal photos be withheld from public disclosure in accordance with Section 0.457 and 0.459 of the Commission's Rules, 47 CFR. The Trial Stimulator is not available for the general public to order. It is a prescription device and is paired to work with the patient's specific implantable device. This request for confidentiality of internal photos is similar to other medical implant manufacturers, who have been afforded permanent confidentiality of internal photos.

Short-term Confidentiality

Algostim hereby requests that the FCC withhold from public review for a period of 45 days from the date of the Grant of Equipment Authorization, certain portions of Algostim's application for equipment certification with the FCC identifier 2ABU84300. Public disclosure of the short-term confidential portions of this application during the period of importation and/or distribution would reveal key

ALGOSTIM, LLC

aspects of the product design to Algostim's competitors and diminish the value of Algostim's investment in research and development.

This request for confidentiality is made pursuant to 47 CFR 0.457(d)(2) and 0.459 of the FCC's rules. Algostim requests that the following documents, submitted in connection with its application for certification with FCC identifier 2ABU84300, be kept confidential for a period of 45 days from the date of the Grant of Equipment Authorization:

1. User Manual
2. External Photos
3. Test Set-Up Photos

Please do not hesitate to contact me at (763) 404-7553 if you would like to discuss this matter.

Sincerely,

Bernard Bosley 6/11/2014
