

Professional Installation Attestation

April 23, 2014

To Whom It May Concern:

Subject – Professional Installation Requirement for BHA-WP200 product.

Please be advised that the BHA-WP200 product needs the professional installation training in terms of configuration and installation of the product due to its unique market and function.

We hereby declare that the BHA-WP200 product will be distributed through an authorized distribution channel which has received the professional training to install this product and will not be sold directly to the general public through a retail store.

Please refer to below requirements for a successful product installation.

- It is recommended to tune the direction of antenna for optimal performance depending on the IP camera and NVR's installation location.
- It is important to tune the antenna appropriately because it may cause decrease of the antenna performance in case of a faulty installation.
- It is recommended to install the IP camera and NVR's antennas horizontally with each other.
- It is strongly recommended to install the antennas horizontally according to dipole antenna's features because it may cause decrease of the antenna performance in case of a vertical location of antennas.
- It is recommended to assemble the antenna connector tight to the maximum.

Thank you for your attention.

Sincerely Yours,

A handwritten signature in black ink, appearing to be 'Jh' or 'Jhlee', written in a cursive style.
