3. Detail using instruction

First step, Install the battery into battery compartment as below

Red LED Here will blink after battery assembling successfully, it means keyboard has power, you can go to next step

Please see below table showing LED behavior

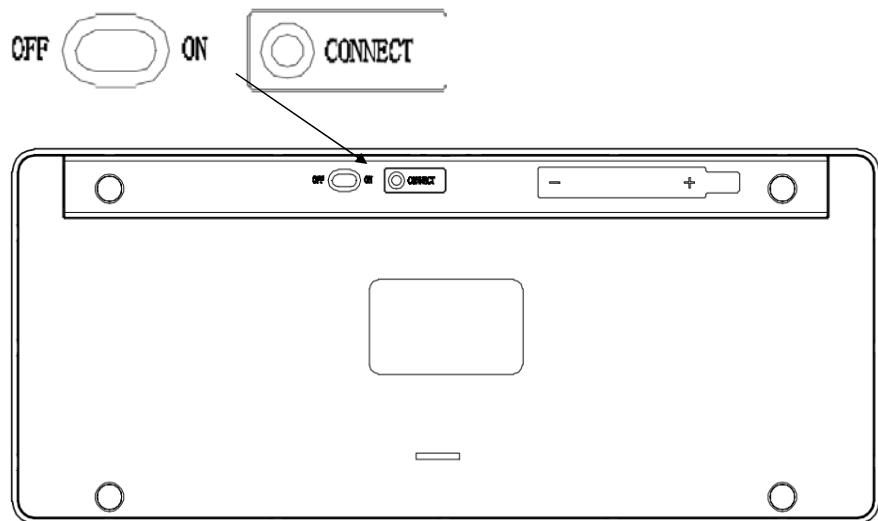

Battery assemble	Red lights stop flashing, red light turns off after 3 seconds
Pairing start	Red light flashes
Pairing complete	Red lights stop flashing, red light turns off after 3 seconds
Out of range	Bright red light, closes after 5 seconds
Low battery indicator	Slow flashing red light, every 5 seconds Gunter confirmation

Then Turn the power switch on keyboard back to "ON", power is ON

Then press "Connect" button, Red led will keep flash. Please open "Bluetooth setting" on your tablet and it will search automatically

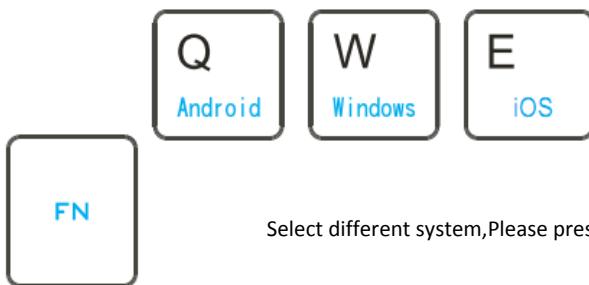

There's a device "Bluetooth 3.0 Keyboard", click here and a set of four-digit code will be generated randomly

Please enter four code above, Pairing completes. Red lights stop flashing, and turns off after 3 seconds

Remark:

Before using, please ensure you switch keyboard to homologous system (Windows/Android/IOS with FN combination)

Select different system, Please press "Q" or "W" or "E" and FN combination
