1274 Anvilwood Avenue

Sunnyvale, CA 94089

Dear Sir/Madam,

We, Roam Data Inc., hereby authorize Bay Area Compliance Laboratories Corp. to act as a laboratory for testing and test report generation for the following project(s):

(Product name: mPOS, Model number : RP750x, FCC ID: 2ABY6-RP750X)

We affirm ISSC BM77SPP module supports the EDR-a combination of GFSK and Phase Shift Keying modulation (PSK) with two variants, $\pi/4$ -DQPSK and 8DPSK. And also the BM77SPP have passed the BQTF certification and could pass the FCC regulation without any issue.

Although the nominal rate of EDR is to maximum 3 Mbit/s, to enhance the capability of anti-interference the BM77SPP is turned off the 3 Mbit/s data rate under the SPP UART transparent application.

Please rest assured that it would not affect the throughput of SPP UART transparent application.
