

INSTALLATION

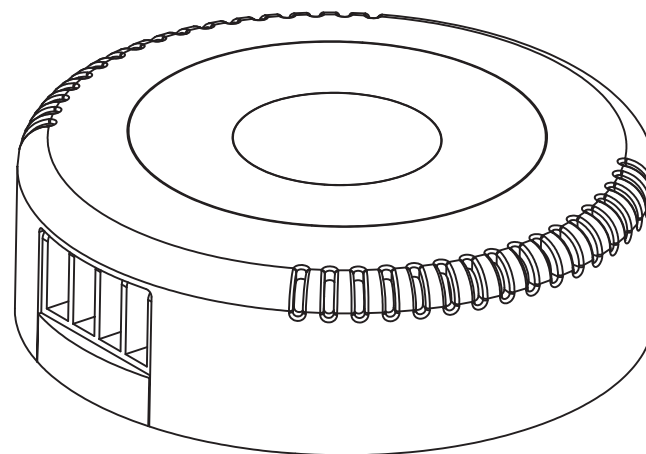

1. When plug in, the indicator blue light will light up.
2. When pairing with RBT-402, searching for BT20 in your bluetooth device (ex. Cell phone)
3. When RBT-402 is successfully paired with your bluetooth device, the speaker will play the voice "Done" at first time, then you can play the music from your bluetooth device.
As for repeat pairing, the speaker will play the voice "bluetooth paired"
4. If you connect RBT-402 to an External Amplifier while bluetooth is not paired, The speaker will play the music from your external device (ex. CD player)
5. If bluetooth is paired and you pause or stop playing the music from your bluetooth device, RBT-402 automatically switch to play the music from your external device.

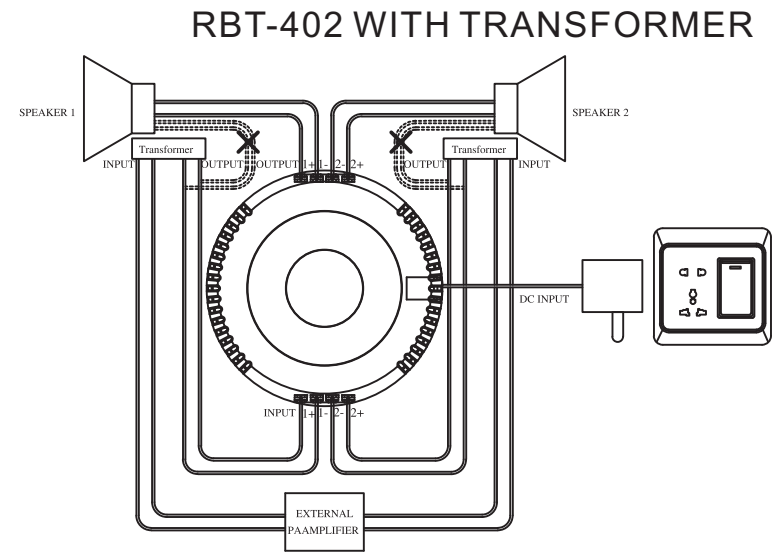

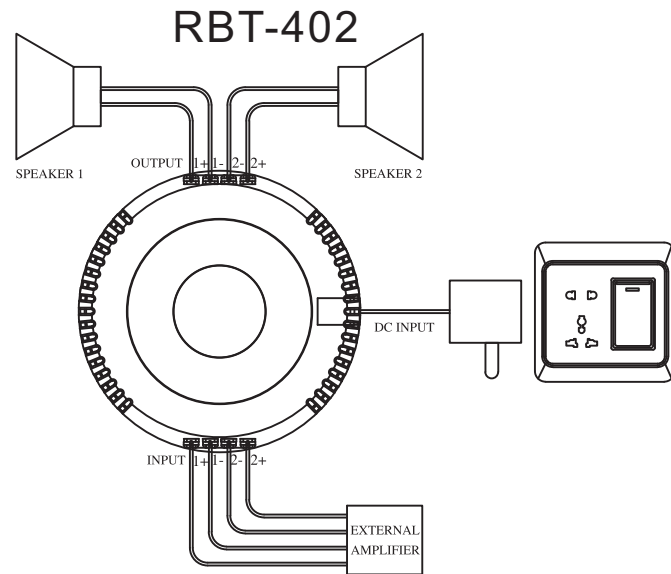

Instruction Manual

AMPLIFIER BOX WITH BLUETOOTH

Whenever the bluetooth music signal is stop, the relay will be released to switch to the external amplifier.

FCC Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
