5. Product quick use

5.1 Download and install App

You can set up the watch through the "Cubitt Jr+Teens" App for iOS or Android devices. You need download and install the "Cubitt Jr+Teens" App from App Store or Google Play Store:

Or you can scan the right QR code on the watch/giftbox/user manual to download the app:

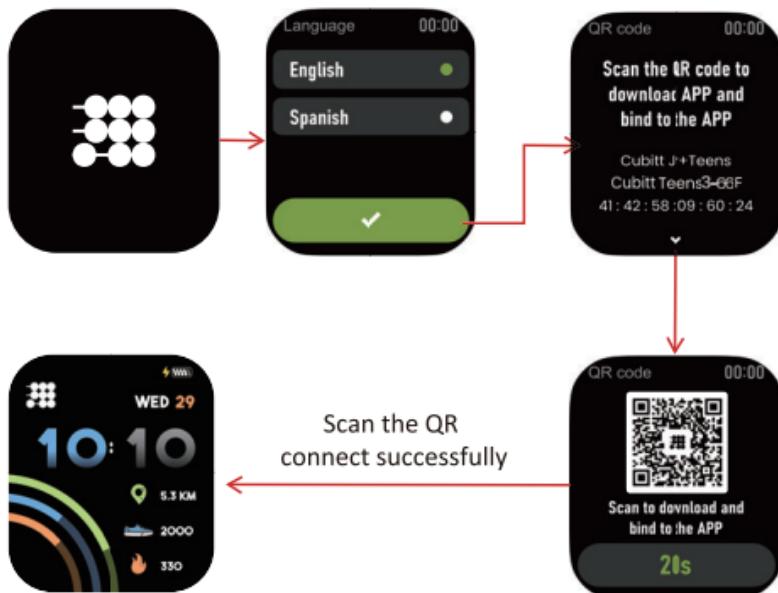

Android+IOS

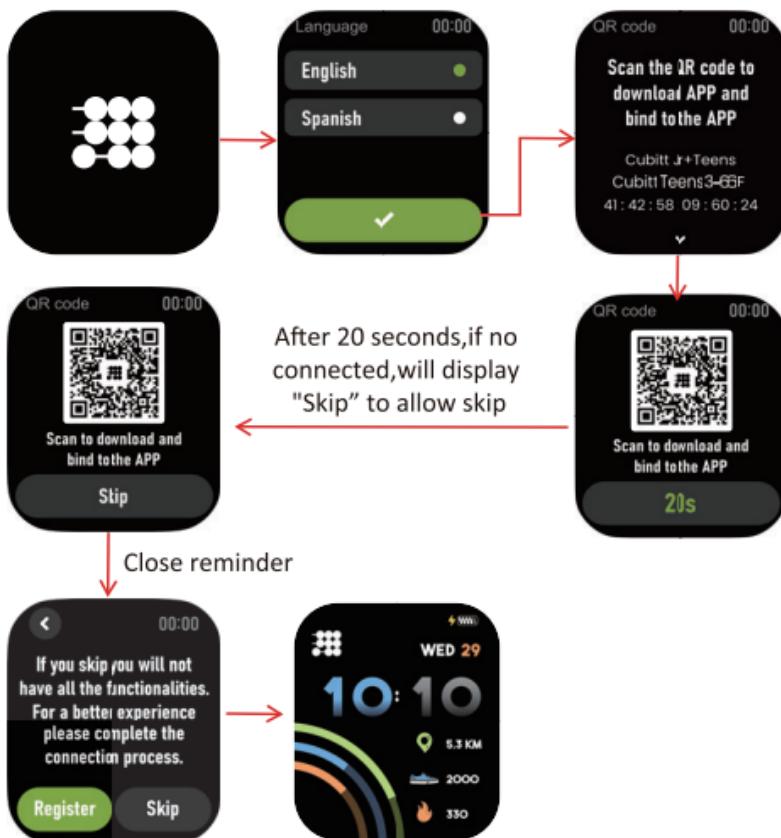

For quickly binding the APP on the watch directly, you can see below connection instruction:

There are 2 different connection states:

The first one: Directly scan the QR code and download the APP, and then connect successfully.

The second one: After 20 seconds, if no connected, will display "skip" button to allow skip, you can choose to scan the QR code and download the APP, then connect successfully. Or you can choose to click "skip" and there will be a close reminder to remind users to connect to the APP to better experience the multi-function of the watch. If the user does not want to connect, will jump to the page of the watchface.

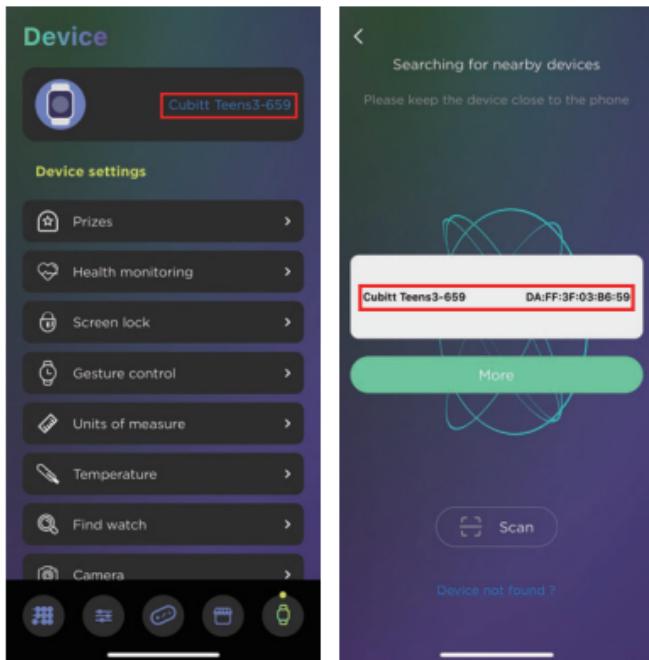

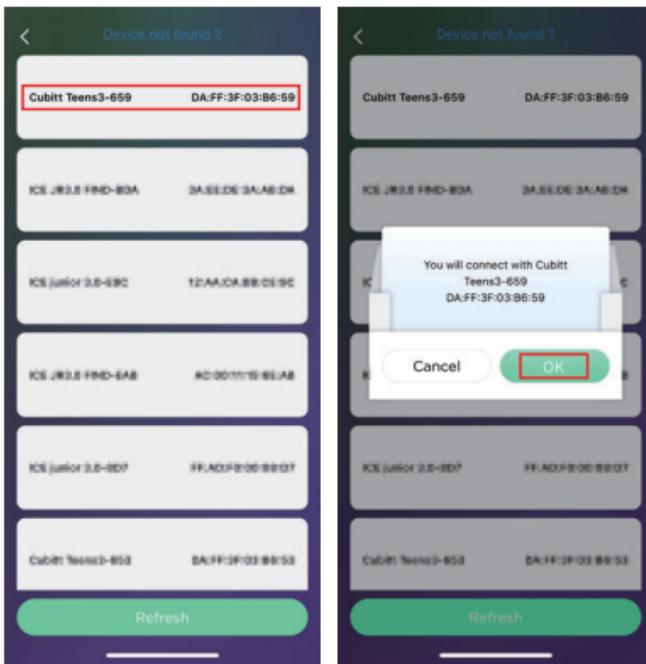

5.2 Connection and Synchronize data

Turn on the Bluetooth and GPS on your mobile phone.

5.2.1 Bluetooth connection

- (1) Install and open "Cubitt Jr+Teens" App.
- (2) In the home page, press "Personal center" - "Device" menu to Searching for nearby devices page.
- (3) Press "More" to searching device, select product mode LiteT3 and click "OK" to bind watch as below.
In "Setting" menu on the watch - find "System" - "System version" to check the watch Bluetooth name.

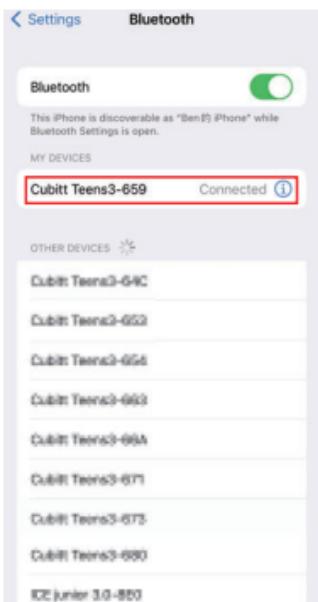

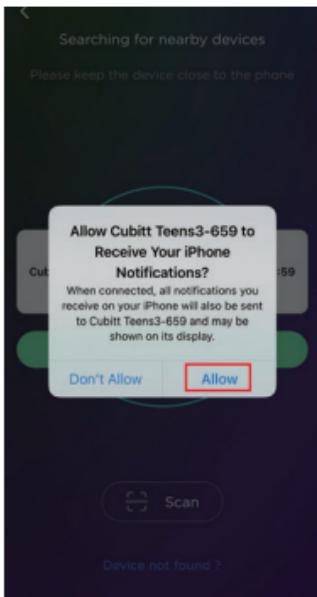

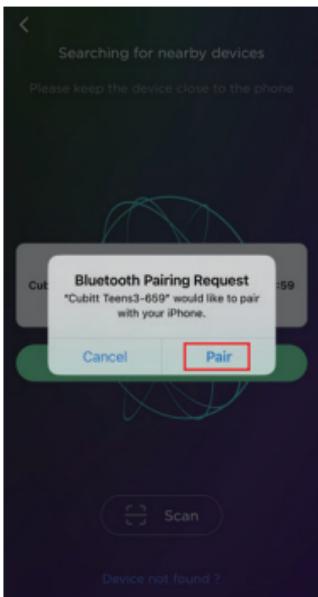

After connected successfully, shown as the icon in the watch status bar:

Notice:

- * If your phone is iOS system, you need agree to pair with your phone and display your iPhone notifications. The Bluetooth menu of the phone interface displays LiteT3 connected successfully as below picture shows.

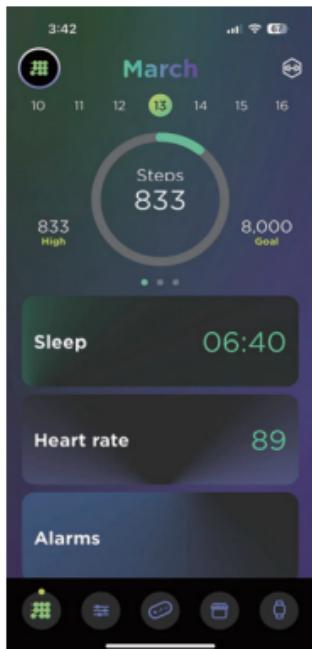

* During binding process, "Cubitt Jr+Teens" will prompt you to enable GPS and Bluetooth, and authorize "Cubitt Jr+Teens" to get access to the GPS on your mobile phone. Or prompt some other permission to allow, please agree to all the permission prompt.

* iPhone will not prompt you with any information unless you complete Bluetooth pairing on your Cubitt Teens3 watch in the built-in Bluetooth in your mobile phone after binding.

5.2.2 Synchronizing data

6. Caveat

Please note that Cubitt smartwatches are not intended for medical purposes. While they offer various features and functionalities that can enhance your everyday life and promote an active lifestyle, they should not be relied upon as medical devices. If you have any specific health concerns or require medical monitoring, we recommend consulting with a healthcare professional.

7. FCC Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and

used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

RF Exposure Information

The device has been evaluated to meet general RF exposure requirement.

The device can be used in 0mm exposure condition, compliance with exposure requirements.

Only in the stated conditions, the device is shown to fully comply with the FCC RF Exposure requirements of KDB 447498.
