Blue tooth specification: Bluetooth V2.1+EDR

Transmitting distance: $\leq 10\text{M}$ (varies with the various environmental factors and the connected blue tooth equipment)

Voltage: DC 4.5V

Output power: $3\text{W} \times 2$

Frequency response: 20Hz-20 KHz

Sensitivity: $90\text{db} \pm 2\text{db}$

Noise-signal ratio: $\geq 88\text{dB}$

Frequency performance: Full range

IV: Instructions for basic functions

Model of turning on: when you turn on the sound box, it gives out the sound of toot and meanwhile, the indicator lamp shines for around 2 seconds.

Linking up with blue tooth: after turning on the sound system, it will automatically search for blue tooth and the red indicator lamp of blue tooth shines fast; when you turn on your transmitting equipment of blue tooth, please click the link of available equipment, and then the red indicator lamp in question keeps lighting and sound box shows the successful connection by giving out toot ; This device enjoys resuming function, namely, the equipment with successfully connection will automatically connect when restarting the blue tooth.

Tips: if the device failed to be connected, please turn it off and restart it

Music playing of blue tooth: after blue tooth is connected successfully, your device automatically switch into the model of playing music in the blue tooth, its red light slowly shines and the music will be perfectly shown in this device. You can freely control over the volume of sound and the selection of music through the transmitting device of blue tooth

Tips:

1. Some cell phones don't support the function of fade in and fade out, so when you pause the playing or switch the music, sometimes there is POP
2. The disconnected testing is not a real-time one, so when the sound box of blue teeth is off, the terminal

of cell phone will be disconnected after a while.

3. Some domestic cell phones can only match but not be connected, as the software of the cell phone terminal needs to detect the hand-free device before connecting

4. Some cell phones don't support the simple matching, for example, the one with Symbian system, you need to type into matching password 0000 when conducting it

V: compatibility

Based on the rank of CLASS 2 power, we employ the standard of Bluetooth2.1+EDR, which is compatible with the applications of blue tooth 2.1 and its low versions, so the transmitting speed can be up to 3Mbit/s

Six, the scope of use:

The sound is suitable for being installed: Dongguan Xin Yi hardware plastic products Co., Ltd, production: Kmart: UM-15A031B/87008763227-9 music umbrella

Sears music umbrella: UM-15A031B/20513 and the same structure of the sun umbrella.

as follows:

VII. Problems and solutions

Phenomena Problem	Solutions
Failure of connection and matching for several times	1.Check whether the sound system is on the mode of search or turn on the device again 2. Too many blue tooth devices around the sound system lead to the difficulty in searching, please turn off other blue tooth devices.
Low sound or sound distortion	1.Inspect the sound volume of blue tooth and adjust it at the proper position 2.Low voltage of power source
Staccato music	1.Whether it is beyond the effective connecting distance of the sound system, or barriers exist between the sound box and blue tooth equipment
The indicator lamp of blue tooth is not on	1. It means the low power source, please check it. 2. Restart the device.

FCC Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
