### Attestation Letter

#### FEDERAL COMMUNICATIONS COMMISSIONS

Authorization and Evaluation Division  
7435 Oakland Mills Road  
Columbia, MD 21046

To Whom It May Concern,

The chip QCA4020 installed in our product Multimode Module (model name: EH-WL501, FCC ID: 2ACCRWL501), which supports 2.4G Wi-Fi, BLE 1MHz, BLE 2MHz, Zigbee(2405-2475MHz), 5G Wi-Fi Band1(5150-5250MHz), Band2(5250-5350MHz), Band3(5470-5725MHz), Band4(5725-5850MHz) functions. But for this product, it only activates 2.4G Wi-Fi, BLE 1MHz, BLE 2MHz, Zigbee(2405-2475MHz), 5G Wi-Fi Band1 and Band4 functions, the other functions are disabled by using the software.

Please contact me if there is need for any additional clarification or information.

Sincerely,

Signature:
