June 4, 2014

FCC ID : 2ACDQ-KZR-001

To Whom it may concern:

Kezar is a free-standing ticket validation device with a radio that transmits and receives WIFI signals in the 5GHz band to an indoor and outdoor wireless infrastructure. The device has an on/off button and is powered with a rechargeable Li-Ion battery during operation. The unit contains a HF RFID reader module (FCC ID: WZ4GEMINI003) manufactured by Skyetek.

The type of equipment approval is original certification covered by 47 CFR Part 15.247 and 15.407 rules.

Sincerely,

Adrian Fox
Senior Electrical Engineer,
Synapse Product Development
