

User Manual

Model No.: HHRGB14

Transmitter Model No.: HHRGB14 is RF remoter control transmit device, it has eleven key with control signal, use the following:

1. Specification

Operational frequency: 433.92MHz

Modulation type: OOK

Rated Voltage: DC 3V

Rated current: 27MA

Operation temperature: -10°C--+70°C

2. Turn on transmitter shell behind the battery lid, put in a DC 3 voltage battery, attention to the positive and negative polarity, and to ensure good contact.
3. Select and press a transmit key, then the select control signal is transmitting, and the LED indicator is shined, the transmitter cease transmission after the key is released.
4. Please check the battery and replacement a new battery when the transmission distance too short and can't meet requirement.
