This device complies with parts 15 of the FCC Rules.

Operation is subject to the following two conditions: (1) This device may no cause harmful interference, and (2) this device must accept any interference that may cause undesired operation.

Note: This equipment has been tested and found to comply with the limits fora Class B digital device, pursuant to Part 15 of the FCC Rules. These limitsare designed to provide reasonable protection against harmful interferencein a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

-→Reorient or relocate the receiving antenna.

-→Increase the separation between the equipment and receiver.

-→Connect the equipment into an outlet on a circuit different fromthat to which the receiver is connected.

-→Consult the dealer or an experienced Radio/TV technician for help.

SAR tests are conducted using standard operating positions accepted by the FCC with the device transmitting at its highest certified power level in all tested frequency bands, although the SAR is determined at the highest certified power level, the actual SAR level of the device while operating can be well below the maximum value, in general, the closer you are to a wireless base station antenna, the lower the power output.

Before a new tablet is available for sales to the public, it must be tested and certified to the FCC that it does not exceed the exposure limit established by the FCC.

Tests for each tablet are performed in positions and locations as required by the FCC.

For body worn operation, this model tablet has been tested and meets the FCC RF exposure guidelines when used with an accessory designated for this product or when used with an accessory that contains no metal and that positions the handset a minimum of 0cm from the body.

Non-compliance with the above restrictions may result in violation of RF exposure guidelines.
