

Re: e-labelling Approval Request for North Inc. TL1A

To Whom it May Concern:

Applicant: North Inc.
FCC FRN: 0023640295
FCC Grantee Code: 2ACKV
ISED Company Number: 12013A

Model: TL1A
HVIN: TL1A
Proposed FCC ID: 2ACKV-TL1A
Proposed IC: 12013A-TL1A

We would like to request the movement of the FCC ID, IC ID, and Regulatory statements into the User's Manual for this product based on the details provided below.

This product's small size presents a challenge for on-product markings. The available marking area is restricted to the arms of the Focals glasses, which is not sufficient for markings beyond the product brand name.

Access Steps:

The glasses frame includes a power button which is a physical button. The user would access the regulatory information for the glasses by pressing the power button 5 times in quick succession. This action does not require any special accessories or plug-ins, nor does it require any product setup to occur. The location of the power button on the glasses is shown in Appendix A, attached. The user manual will include instructions for accessing this screen. There would not be any sub-menus in place.

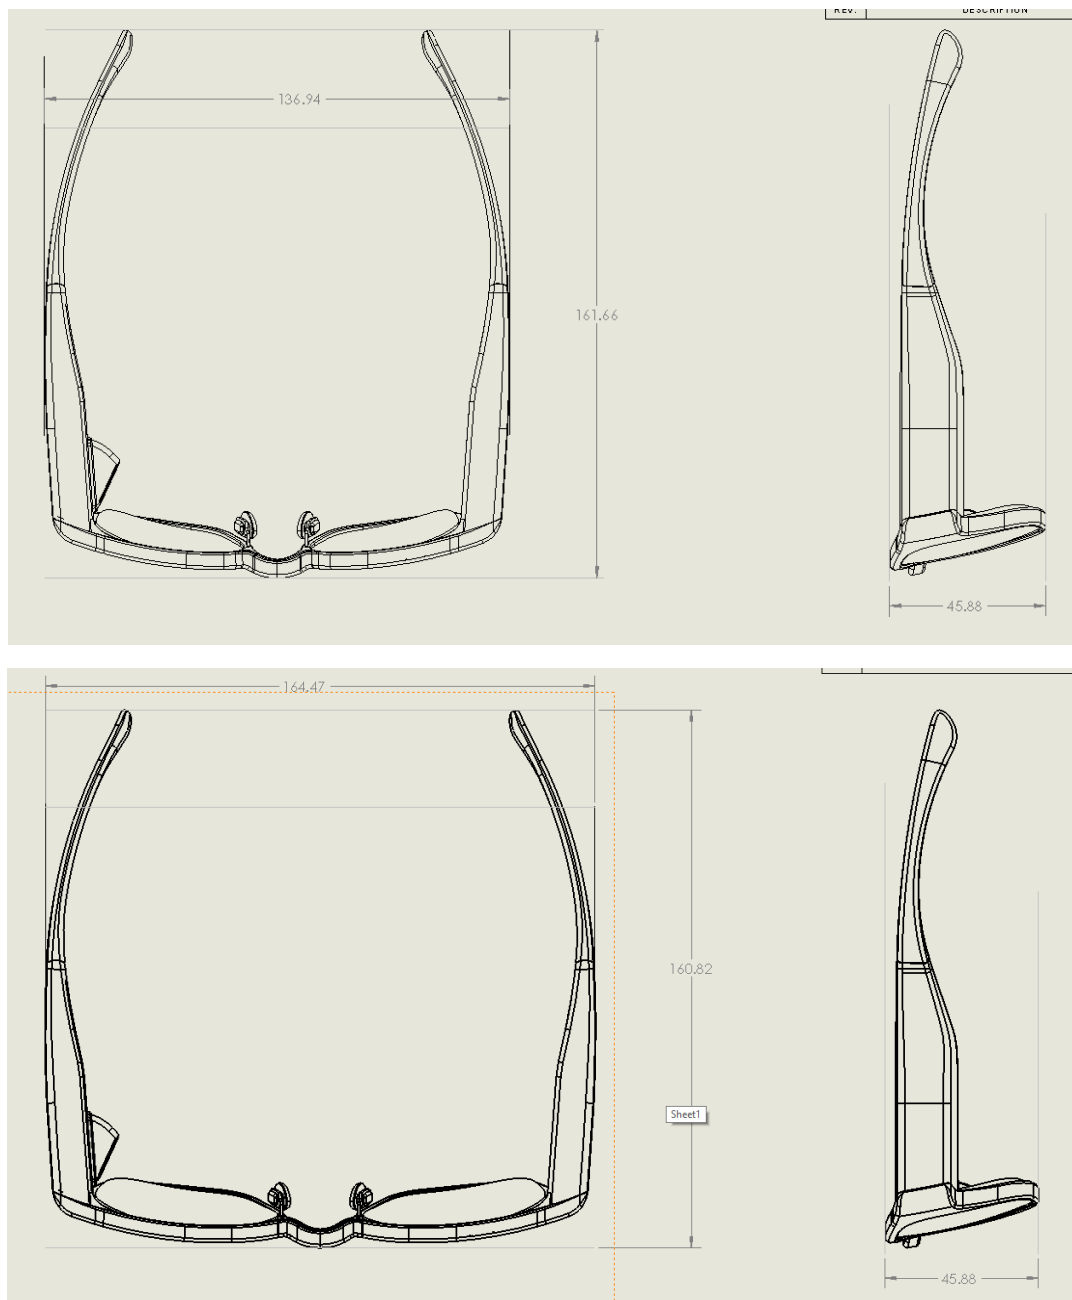

Pursuant to FCC 47 CFR §2.935 and ISED RSP-100 §3/Notice 2014-DRS1003, we propose using the e-labelling method detailed in this document instead of a physical product label for the TL1A product. Thank you in advance for your consideration.

Name: Calum MacKellar
