Bluetooth Keyboard Quick Start Guide

1. Controls

 OFF/ON Slide switch to ON position to power unit on or to OFF position to turn off.

 connect Press the Bluetooth connect button to establish wireless keyboard connection with tablet PC.

2. Keyboard Indicators

 power Slide the OFF/ON button to ON position, the power indicator will turn blue color for four seconds and then turn off in order to save power. NOTE: Even though the indicator turns off, the keyboard will remain on.

 BT Press the “Connect” button and the Bluetooth status light will be blink blue color. This indicator light will stay on until the keyboard connects to your device.

 CAPS Caps lock indicator is lit when the keyboard is set to uppercase text mode.

 Charge When the keyboard is charging, the charging indicator is red color. When it is fully charged, the red indicator will turn off.

3. Connect the Bluetooth Keyboard to Tablet

Step 1: Turn the power toggle switch to ON position. The indicator light will stay on for about five seconds, and then the indicator light will turn off.

Step 2: Press the “Connect” button, the Bluetooth indicator light will blink and the keyboard is now ready to connect to the tablet computer.

Step 3: On the tablet, select: Setting-Bluetooth-on. The tablet computer will automatically search for a Bluetooth-available device. Wireless Keyboard is found and click on the device to connect. Click on the name Bluetooth 3.0 keyboard to connect.

Step 4: Use the keyboard to enter the password code as displayed on screen.

Step 5: When the wireless keyboard has connected successfully, the Bluetooth indicator light will turn off.

4. Charging the Bluetooth Keyboard

When the battery power is low, the power light will start blinking indicating that you need to recharge the keyboard.

Step 1: Connect USB cable to the micro USB interface on the keyboard.

Step 2: Connect the USB cable to the USB power adapter or to the computer USB port.

Step 3: The “Charge” stays on when the keyboard is charging and turns off when it is fully charged.

5. Function keys

	Email		Mute		Settings
	Previous track		Volume down		Enhanced Functions
	Search		Volume UP		
	Next track		Share		
	Lock		Device		

6. Battery

The long-lasting lithium ion rechargeable battery will provide many hours of service with no “memory effect”. So the battery can be recharged at any time. We recommend that you turn the keyboard off during long periods of inactivity.

7. Energy Saving Sleep Mode

The keyboard automatically enters an idle, or sleep mode, when it is inactive for 15 minutes. At that time, the keyboard power will turn off. To resume normal operation, or wake up the keyboard from sleep mode, press any key and wait about three seconds for the keyboard to reset.

8. Product Features:

- 1) Bluetooth wireless keyboard
- 2) Protective leather case with integrated kickstand
- 3) Micro USB interface for easy recharging
- 4) Long lasting, built-in rechargeable lithium battery
- 5) Light weight, quiet keystrokes, water-proof, dust-proof design
- 6) Energy saving sleep mode

9. Keyboard Specification

- 1) Bluetooth interface standard
- 2) Operating distance up to 10 meters
- 3) Modulation system: GFSK
- 4) Operation voltage: 3.0-5.0v
- 5) Operating current: <2.5mA
- 6) Standby current: <0.3mA
- 7) Sleep current: <40uA
- 8) Charge current: 200mA
- 9) Standby time: >40 days
- 10) Charge time: <2 hours
- 11) Lithium battery capacity: 120mA
- 12) Operating time: Up to 40 hours
- 13) Lithium battery life: Up to two years
- 14) Key Strength: 80 +/- 10g.
- 15) Key life: 5 million strokes
- 16) Working temperature: -10 - +55 C

10. Safety Caution

KBT8BK v1

- 1) Keep the keyboard away from sharp objects.
- 2) Do not place heavy objects on the keyboard.
- 3) Do not expose the keyboard to microwave.
- 4) Do not apply undue force or pressure on the keyboard.
- 5) Keep keyboard away from oil, chemicals or any other organic liquids.

11. Cleaning

Clean the keyboard with water, diluted alcohol or light cleaning solution.

12. Troubleshooting

- A. Unable to Connect
- 1) Make sure the keyboard is on (the power indicator ON)
 - 2) Make sure the keyboard is in within the proper operating distance of 10 meters
 - 3) Make sure the battery is recharging properly (the power indicator is red when keyboard is connected to power line)
 - 4) Make sure the Bluetooth setting on the tablet PC is on
 - 5) Press the key “Connect” to establish Bluetooth connection
- B. Unable to Charge Keyboard
- 1) Make sure the USB power cable is connected properly to the keyboard and the power source.
 - 2) Make sure the wall charger is plug into the power outlet. NOTE: The output voltage and current of the power adapter cannot exceed DC5.0V, 500mA or it may damage the keyboard.

13. Special Keys Description

You may want to learn the special function [Fn] Combination media keys to operate your tablet PC more easily. Hold the Fn key while selecting the desired media keys.

14. Transport Tablet PC

- 1) Place keyboard to the one side that has a magnet. The latch magnet will automatically catch and insert tablet in case.
- 2) Pull tablet PC out from card slot to release.

FCC WARNING:

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
