## 13 Services

### 13.1 Internet

**Menu > Settings>Internet**

To access this menu, enter the Main Menu in the standby mode and then select Internet. You can use the network-related services with this function.

## 14 Health and Safety Precautions

Please read these simple guidelines. Not following them may be dangerous or illegal.

**SAR Compliance**

- Your phone is designed not to exceed the limits of emission of radio waves recommended by international guidelines.

- SAR (specific absorption rate) is the measurement of body-absorbed RF quantity when the phone is in use. SAR value is ascertained according to the highest RF level generated during laboratory tests.

- The SAR value of the phone may depend on factors such as proximity to the network tower, use of accessories or other accessories.

- The highest SAR value of the device at the head and body are   W/kg and   W/kg respectively averaged over 1 gm of human tissue.

**SAR Recommendations**

- Use a wireless hands-free system (headphone, headset) with a low power Bluetooth emitter.

- Please keep your calls short and use SMS whenever more convenient. This advice applies especially to children, adolescents and pregnant women

- Prefer to use your cell phone when the signal quality is good.

- People having active medical implants should preferably keep the cell phone at least 15 cm away from the implant.

- Maintain a preferable distance of 15 mm from the device.

**Safe Driving**

- Do not use the phone while driving. When you have to use the phone, please use the personal hands-free kit.

- Please do not put the phone onto any passenger seat or any place from which it may fall down in case of vehicular collision or emergency braking.

**During Flight**

- Flight is influenced by interference caused by the phone. It is illegal to

use a phone on the airplane. Please turn off your phone during a flight.

**In Hospitals**

- Your Phone's radio waves may interfere with the functioning of inadequately shielded medical devices. Consult a physician or the manufacturer of the medical device to determine whether they are adequately shielded from external Radio Frequency. Switch off your device when regulations posted instruct you to do so.

- To avoid potential interference with implanted medical devices such as a pacemaker or cardioverter defibrillator:

- Always keep your phone at least 15.3 centimeters (6 inches) from the medical device.

- Do not carry the wireless device in a breast pocket.

- Turn off the phone if there is any reason to suspect that interference is taking place.

- Follow the manufacturer directions for the implanted medical device.

- If you have any questions about using your wireless device with an implanted medical device, consult your health care provider.

**Unsafe Areas**

- Please turn off your phone when you are close to a gas station or in the vicinity of any place where fuel and chemical preparations, or any other dangerous goods are stored.

## 15 Taking Care of Your Device

Your device is a product of superior design and craftsmanship and should be handled with care: The following suggestions will help you protect your phone:

- Keep the device dry. Precipitation, humidity, and all types of liquids or moisture can contain minerals that will rust electronic circuits. If your device does get wet, remove the battery without turning on the device, wipe it with a dry cloth and take it the service center.

- Do not store the device in high or cold temperature. High temperatures can shorten the life of electronic devices and damage batteries.

- Do not use or store the device in dusty, dirty areas. Its moving parts and electronic components can be damaged.

- Do not attempt to open the device other than as instructed in this guide. Repairing this phone by yourself other than our authorized service agents/centers goes against the warranty rules.

- Do not drop, knock, or shake the device. Rough handling can break internal circuit boards and fine mechanics.

- Do not use harsh chemicals, cleaning solvents, or strong detergents to clean the device. Only use a soft, clean, dry cloth to clean the surface

of the device.

▪ Do not store your device near magnetic fields or allow your device to come in contact with magnetic fields for extended period of time.

**Battery Recommendations:**

- Please put the battery in a cool and well-ventilated place out of direct sunlight. We recommend you to charge the battery at room temperature range.

- Batteries have life cycles. If the time that the battery powers equipment becomes much shorter than usual, the battery life is at an end. Replace the battery with a new battery of the same make and specification.

- Do not discard the battery with household trash. Please dispose of used battery according to your local environmental laws and guidelines.

- Use manufacturer approved batteries, chargers, accessories and supplies. Karbonn COMAX A62 will not be held responsible for user's safety when using unapproved accessories or supplies.

**Recycle Your Handset**

The WEEE logo (shown at the left) appears on the product (battery, handset, and charger) to indicate that this product must not be disposed off or dumped with your other household wastes. You are liable to dispose of all your electronic or electrical waste equipment by relocating over to the specified collection point for recycling. of such hazardous waste.

Specified collection points for recycling of such hazardous waste. Collection and proper recovery of your electronic waste equipments at the time of disposal will allow us to help preserve the environment. Recycling of the electronic waste equipment will ensure safety of human health and environment. For more information on best practices for disposal of electronic and electrical waste, please visit to our web site: www.micromaxinfo.com/weee.php.

**Disclaimers**

1. The colors and specifications shown/mentioned in the user manual may differ from the actual product. Images shown are for representation purpose only. Other product logos and company names mentioned herein may be trademarks or trade names of their respective owners.

2. Karbonn COMAX A62 keeps the right to make modifications to any of the content in this user guide without public announcement in

advance. The content of this manual may vary from the actual content displayed in the mobile phone. In such a case, the latter shall govern.

**Copyrights**

FCC RF Exposure Information and Statement
The SAR limit of USA (FCC) is 1.6 W/kg averaged over one gram of tissue.
Device types: CL1839(FCC ID:   2ACNECL1839) has also been tested against this
SAR limit. The highest SAR value reported under this standard during product
certification for use at the ear is 0.434W/kg and when properly worn on the body
is 0.388W/kg. This device was tested for typical body-worn operations with the
back of the handset kept 1.5 cm from the body. To maintain compliance with FCC
RF exposure requirements, use accessories that maintain a 1.5 cm separation
distance between the user's body and the back of the handset. The use of belt
clips, holsters and similar accessories should not contain metallic components
in its assembly. The use of accessories that do not satisfy these requirements
may not comply with FCC RF exposure requirements, and should be avoided.

This device complies with part 15 of the FCC rules. Operation is subject to the
following two conditions: (1) this device may not cause harmful interference,
and (2) this device must accept any interference received, including
interference that may cause undesired operation.
NOTE: The manufacturer is not responsible for any radio or TV interference
caused by unauthorized modifications to this equipment. Such modifications
could void the user's authority to operate the equipment.
NOTE: This equipment has been tested and found to comply with the limits for
a Class B digital device, pursuant to part 15 of the FCC Rules. These limits
are designed to provide reasonable protection against harmful interference in
a residential installation. This equipment generates uses and can radiate
radio frequency energy and, if not installed and used in accordance with the
instructions, may cause harmful interference to radio communications.
However, there is no guarantee that interference will not occur in a particular
installation.
If this equipment does cause harmful interference to radio or television
reception, which can be determined by turning the equipment off and on, the
user is encouraged to try to correct the interference by one or more of the
following measures:
- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
-Connect the equipment into an outlet on a circuit different from that to which
the receiver is connected.

-Consult the dealer or an experienced radio/TV technician for help.

**Any Changes or modifications not expressly approved by the party responsible for**

**compliance could void the user's authority to operate the equipment.**
