

MANUAL

Quick Start Guide

1/ Warning

* Do not use any fast charger or PD charger or GaN charger or quick charger exceed 5V-1A output.

*The device is IPX7 waterproof.Do not expose it to water while charging.

*As doing so may result in permanent damage to the speaker or power source.

2 What is TWS?

TWS means true wireless stereo. Let's say two

Bluetooth speaker are able to be paired and playing

music synchronously.

How to pair your device?

1/ Disconnect the bluetooth device from the speaker before pairing;

2/ Select either speaker. Triple click the "Play" button to enter the series state,

The two speakers will pair themselves;

3/ After successful pairing, there will be a prompt

sound, and one of the LED indicators on the two

speakers will keep the blue light on; Another blue light flashed;

4/ Turn on the Bluetooth device, find "Jumbostone " on the device, and click

Connect; After the connection is completed, the blue lights of the two speakers are

always on;

5/ If the speaker is paired correctly for the first time, the speaker will be paired

automatically for the next time without the previous pairing operation.

7/Specifications

- Bluetooth version:5.3
 - Effective bandwidth:80Hz-18KHz
 - Output sound pressure level:80±2dB
 - Battery Specification: 3.7v/3300mah
 - Charging time: about 2.5 hours
 - Input power supply:type-C 5v/1a
 - Playback time: more than 20 hours
(depending on the volume)
 - Size:(length× wide× Height)96× eighty-five× 53(mm)
- Weight:282g

⁸/Performance optimization

*The speaker usage time will vary depending on the volume and song.

*Playing loudest and playing heavy bass songs will speed up battery consumption.

(1) When the device is tuned to the maximum sound, it will protect the speaker components, including the optimization of battery durability and playback time.

(2) That is, in order to play longer and reduce battery consumption, the balance of the tone will be adjusted appropriately, including the adjustment of the bass, treble and vocal parts.

(3) Therefore, the loudest and medium-volume heavy bass levels are different.

* We recommends that the device be adjusted to a medium volume for listening, this will maintain the best sound and battery performance.

FCC Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules.

These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. The device has been evaluated to meet general RF exposure requirement.

The device can be used in portable exposure condition without restriction.
