Attestation Statement: Roombox WLAN and Bluetooth LE Transmitter Functionality

Telecommunication Certification Body

UL VS Ltd.
Grove House,
Lutyens Close,
Basingstoke,
Hampshire,
RG24 8AG, UK

FCC ID: 2ACYQRB1

28th October 2014

On behalf of 1066 Labs Ltd, I declare that the WLAN and Bluetooth modes listed below have not been enabled in the Roombox product.

1. WLAN IEEE 802.11 a, n (5 GHz Band)
2. WLAN IEEE 802.11 n 40 MHz bandwidth (2.4 GHz Band)
3. Bluetooth LE.

Disabling these modes has been achieved by software inhibiting receive and transmission operations.

In addition, the WLAN band is limited to 2412-2462 MHz for use in the US. This limitation has been achieved by software inhibiting receive and transmission operations on 802.11 Channels 12 and 13.

The bootloader is signed with a secure certificate and the end-user will not have the ability to install any modified software on Roombox in an attempt to enable these modes or to extend the frequency range to use WLAN channels 12 and 13.

Yours faithfully,

Philip Greenhalgh, Chief Science Officer
