		Data Rate / Modulation
		GFSK
		1Mbps

2.2 Connection Diagram of Test System

<Bluetooth – LE Tx Mode>

2.3 EUT Operation Test Setup

For Bluetooth function, programmed RF utility, "USB Cable" connect to "set up notebook" make the EUT provide functions like channel selection and power level for continuous transmitting and receiving signals.

2.4 Measurement Results Explanation Example

For all conducted test items:

The offset level is set in the spectrum analyzer to compensate the RF cable loss and attenuator factor between EUT conducted output port and spectrum analyzer. With the offset compensation, the spectrum analyzer reading level is exactly the EUT RF output level.

Example :

The spectrum analyzer offset is derived from RF cable loss and attenuator factor.

Offset = RF cable loss + attenuator factor.

Following shows an offset computation example with cable loss 4.2 dB and 10dB attenuator.

$$\begin{aligned}\text{Offset(dB)} &= \text{RF cable loss(dB)} + \text{attenuator factor(dB)} \\ &= 4.2 + 10 = 14.2 \text{ (dB)}\end{aligned}$$
