

# RF Exposure Evaluation declaration

Product Name : Bicycle Light  
Trade Name : LEZYNE  
Model No. : SUPER DRIVE, MEGA DRIVE  
FCC ID : 2AD4S-1LED7V3

Applicant : Lezyne USA, Incorporated  
Address : 645 Tank Farm Road Unit F, San Luis Obispo,  
California, 93401, United States

Date of Receipt : Nov. 19, 2019  
Date of Declaration : Feb. 11, 2020  
Report No. : 19B0252R-RFUSP02V00  
Report Version : V1.0

The declaration results relate only to the samples calculated.

The declaration shall not be reproduced except in full without the written approval of DEKRA Testing and Certification Co., Ltd..

# Test Report Certification

Issued Date : Feb. 11, 2020

Report No. : 19B0252R-RFUSP02V00

Product Name : Bicycle Light

Applicant : LEZYNE USA Inc.

Address : 645 Tank Farm Road, Suite F, San Luis Obispo, CA 93401,  
USA

Manufacturer : LEZYNE USA Inc.

Model No. : SUPER DRIVE, MEGA DRIVE

FCC ID : 2AD4S-1LED7V3

EUT Voltage : DC 3.7V (Power by Battery)

Testing Voltage : AC 120V/60Hz (Power by Adapter & PC)  
DC 3.7V (Power by Battery) & DC 5V (Power Bank)

Trade Name : LEZYNE

Applicable Standard : FCC 47 CFR Part 2.1091 Radiofrequency radiation  
exposure evaluation: mobile devices.

Laboratory Name : Hsin Chu Laboratory

Address : No.372-2, Sec. 4, Zhongxing Rd., Zhudong Township,  
Hsinchu County 310, Taiwan, R.O.C.  
TEL: +886-3-582-8001 / FAX: +886-3-582-8958

Test Result : Complied

Tested By :

( Scott Chang / Engineer )

Approved By :

( Louis Hsu / Deputy Manager )

## 1. General Information

### 1.1. Test Facility

Ambient conditions in the laboratory:

| Items            | Test Item         | Required | Test Site |
|------------------|-------------------|----------|-----------|
| Temperature (°C) | Peak Output Power | 15 - 35  | 3         |
| Humidity (%RH)   |                   | 25 - 75  |           |

Note: Test site information refers to Laboratory Information.

### Laboratory Information

**USA** : FCC Registration Number: TW3024  
**Canada** : IC Registration Number: 22397-1 / 22397-2 / 22397-3

The address and introduction of DEKRA Testing and Certification Co., Ltd. laboratories can be founded in our Web site: <http://www.dekra.com.tw>

## 1.2. List of Test Equipment

Peak Output Power / SR12-H

| Instrument                             | Manufacturer | Model No. | Serial No. | Cal. Date  | Next Cal. Date |
|----------------------------------------|--------------|-----------|------------|------------|----------------|
| High Speed Peak Power Meter Dual Input | Anritsu      | ML2496A   | 1602004    | 2019/12/02 | 2020/12/01     |
| Pulse Power Sensor                     | Anritsu      | MA2411B   | 1531043    | 2019/12/02 | 2020/12/01     |
| Pulse Power Sensor                     | Anritsu      | MA2411B   | 1531044    | 2019/12/02 | 2020/12/01     |
| Power Meter                            | Keysight     | 8990B     | MY51000248 | 2019/05/21 | 2020/05/20     |
| Power Sensor                           | Keysight     | N1923A    | MY57240005 | 2019/05/21 | 2020/05/20     |

Note: All equipment upon which need to calibrated are with calibration period of 1 year.

## 1.3. Uncertainty

| Test item         | Uncertainty   |
|-------------------|---------------|
| Peak Output Power | $\pm 2.26$ dB |

Determining compliance shall be based on the results of the compliance measurement, not taking into account measurement instrumentation uncertainty.

## 2. RF Exposure Evaluation

### 2.1. Limits

According to FCC 1.1310: The criteria listed in the following table shall be used to evaluate the environment impact of human exposure to radio frequency (RF) radiation as specified in 1.1307(b)

#### LIMITS FOR MAXIMUM PERMISSIBLE EXPOSURE (MPE)

| Frequency Range (MHz)                                     | Electric Field Strength (V/m) | Magnetic Field Strength (A/m) | Power Density (mW/cm <sup>2</sup> ) | Average Time (Minutes) |
|-----------------------------------------------------------|-------------------------------|-------------------------------|-------------------------------------|------------------------|
| (A) Limits for Occupational/ Control Exposures            |                               |                               |                                     |                        |
| 300-1500                                                  | --                            | --                            | F/300                               | 6                      |
| 1500-100,000                                              | --                            | --                            | 5                                   | 6                      |
| (B) Limits for General Population/ Uncontrolled Exposures |                               |                               |                                     |                        |
| 300-1500                                                  | --                            | --                            | F/1500                              | 6                      |
| 1500-100,000                                              | --                            | --                            | 1                                   | 30                     |

F= Frequency in MHz

#### RF Field Strength Limits for Controlled Use Devices (Controlled Environment)

| Frequency Range (MHz)                                                                                               | Electric Field (V/m rms) | Magnetic Field (A/m rms)        | Power Density (W/m <sup>2</sup> ) | Reference Period (minutes) |
|---------------------------------------------------------------------------------------------------------------------|--------------------------|---------------------------------|-----------------------------------|----------------------------|
| 0.003-1023                                                                                                          | 170                      | 180                             | -                                 | Instantaneous*             |
| 0.1-10                                                                                                              | -                        | 1.6/ $f$                        | -                                 | 6**                        |
| 1.29-10                                                                                                             | 193/ $f$ 0.5             | -                               | -                                 | 6**                        |

| 15000-150000                                                                                                        | 137                      | 0.364                           | 50                                | 616000/ $f$ 1.2            |
| 150000-300000                                                                                                       | 0.354 $f$ 0.5            | 9.40 x 10 <sup>-4</sup> $f$ 0.5 | 3.33 x 10 <sup>-4</sup> $f$       | 616000/ $f$ 1.2            |
| <b>Note:</b> $f$ is frequency in MHz. *Based on nerve stimulation (NS). ** Based on specific absorption rate (SAR). |                          |                                 |                                   |                            |

### Friis Formula

Friis transmission formula:  $P_d = (P_{out} \cdot G) / (4 \cdot \pi \cdot r^2)$

Where

$P_d$  = power density in  $\text{mW}/\text{cm}^2$

$P_{out}$  = output power to antenna in mW

$G$  = gain of antenna in linear scale

$\pi$  = 3.1416

$R$  = distance between observation point and center of the radiator in cm

$P_d$  is the limit of MPE,  $1 \text{ mW}/\text{cm}^2$ . If we know the maximum gain of the antenna and the total power input to the antenna, through the calculation, we will know the distance  $r$  where the MPE limit is reached.

## 2.2. Test Procedure

Software provided by client enabled the EUT to transmit and receive data at lowest, middle and highest channel individually.

### 2.3. Test Result of RF Exposure Evaluation

|                          |                                                          |
|--------------------------|----------------------------------------------------------|
| Product                  | Bicycle Light                                            |
| Test Mode                | Mode 1: Transmit                                         |
| Test Condition           | RF Exposure Evaluation                                   |
| Environmental Condition: | Temperature (°C) : 21.5 ; Relative Humidity (%RH) : 55.0 |

**Antenna Gain:** The maximum antenna gain is -2.4 dBi.

#### Output Power into Antenna & RF Exposure Evaluation Distance:

| Channel | Channel Frequency (MHz) | Maximum Conducted Output Power |       | Power Density at R = 20 cm (mW/cm <sup>2</sup> ) | Limit (mW/cm <sup>2</sup> ) |
|---------|-------------------------|--------------------------------|-------|--------------------------------------------------|-----------------------------|
|         |                         | (dBm)                          | (mW)  |                                                  |                             |
| 00      | 2402                    | 0.130                          | 1.030 | 0.0001                                           | 1.000                       |
| 19      | 2440                    | -0.250                         | 0.944 | 0.0001                                           | 1.000                       |
| 39      | 2480                    | -0.550                         | 0.881 | 0.0001                                           | 1.000                       |

Note:

1. The results are evaluated using the maximum power from test report no. 19B0252R-RFUSP01V00
2. The antenna information is from the customer declaration.
