Equipment Authorization Division  
Federal Communications Commission  
7435 Oakland Mills Road  
Columbia, MD 21046

FCC ID: 2AD7T11115110401

Product Name: Sense Tag Tag-J120, Tag-J130, Tag-J131

**Model difference letter**

Models Tag-J120 and Tag-J130 are electrically identical. The only difference is the enclosure. Tag-J120 fits to a standard hospital wristband. Tag-J130 is intended to be used on a lanyard.

Tag-J131 differs electrically only slightly from the two other models, it has cut band tamper detection to detect if a wristband is forcefully removed or cut. The enclosure is designed to fit on a Sonitor wristband.

To locate the electrical difference, please refer to schematic file named “113105-01.Tag-J PBA W LF v3.20.pdf”, page 8.

The main PCB in all models is the same.

Sincerely,

*Hanna Luukkonen*
