Nemko Canada Inc.  
303 River Road  
Ottawa, Ontario, Canada  
K1V 1H2

IC: 12747A-KSCH  
FCC: 2AD89KSCH

Models: ClubHub

To Whom It May Concern:

This is to inform you that the Kinetek Sports ClubHub circuit board is permanently glued into a molded screw housing with the component-side down. This results in only the battery holder and contacts being visible when the cap is removed. Therefore it is not possible to identify the components used other than the battery holder and spring contacts by removing the cap. There is no visibility into the screw housing once the circuit board is permanently bonded.
