Class II Permissive Change for FCC ID: 2ADAT-T40S2TOS6

We want to add a new variant to the certified torque meter with the FCC ID: 2ADAT-T40S2TOS6.

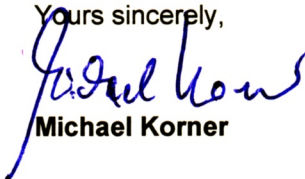

The new variant of the T40S2TOS6 is documented in the test report #EMCC-040197.1G, 2021-02-02. This type is applied with another type of Rotor PCB. All other parts are the same.

Due to this change the external pictures and Internal pictures from the stator have been changed. In future both types are available.

The test report #EMCC-040197.1G, 2021-02-02 were made for the S2.

The new PCB has the same functionally as the older PCB. Only some passive components are having a smaller packaging

Yours sincerely,

Michael Korner
