To whom it may concern
Declaration

1. The Pixie system uses UWB transmission on demand (per user usage – e.g. when user open the app)
2. The UWB transmitter is only sending information to an associated receiver (performing ranging between two devices)
3. The Pixie system has UWB acknowledgment of reception (both negative and positive) every 100ms
4. In case 10 consecutive receptions fails (1 sec) the Pixie system stops the UWB activity.

Sincerely yours,

Tsach Shwartz, VP R&D
