

# Haleon BTP Labeling Requirements

## Module Label

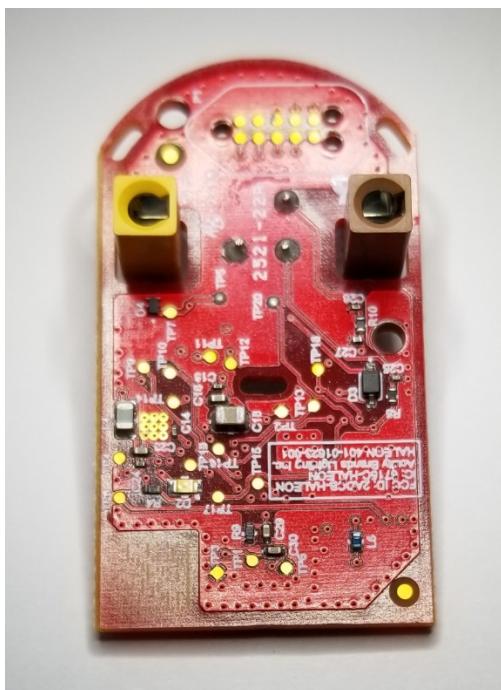

A label will be silkscreened to the PCB. The size of this label will be no greater than 16x16mm. And will contain the following text:

FCC ID: 2ADCB-HALEON  
IC: 6715C-HALEON  
Acuity Brands Lighting Inc.  
HALEON

The label can also contain information related to manufacturing identification. The above information is the only required information.

Final Specification:

FCC ID: 2ADCB-HALEON  
IC: 6715C-HALEON  
Acuity Brands Lighting Inc.  
HALEON 921-01623-001

## Host Label

A label will be affixed to the host device with the following text:

Contains FCC ID: 2ADCB-HALEON  
Contains IC: 6715C-HALEON  
Acuity Brands Lighting Inc.  
HALEON

This device complies with Part 15 of the FCC Rules.  
Operation is subject to the following two conditions:  
(1) This device may not cause harmful interference,  
and (2) this device must accept any interference  
received, including interference that may cause  
undesired operation.

The label will be properly sized to fit the application. If the host device is smaller than the palm of a hand, the label will be:

Contains FCC ID: 2ADCB-HALEON  
Contains IC: 6715C-HALEON  
Acuity Brands Lighting Inc.  
HALEON

The label will be properly sized to fit the application.

Example:

## User Manual:

The HALEONBTP user manual will contain all information required to create a label.
