Columbia, MD 21046

To whom it may concern:

Mesh Motion Inc, hereby requests a Permissive Change Class II of the radio equipment certification for BitLock certification number, FCC ID: 2ADIGGX1-BTLK01. This product differs from the originally approved product in the following manor:

- (a) Associated digital circuitry. The digital circuitry is changed to perform authentication function and handling business specific logic.
- (b) Functional capabilities. – No changes made to functional capabilities
- (c) Antenna Characteristics. – No changes made to the Antenna
- (d) Cosmetic differences – A new mechanical system is added to perform locking/unlocking

I do attest that the Field strength and/or RF Output readings remained the same or are lower than the originally approved product and that they did not increase therefore qualifying this product for this application type.

Sincerely,

A handwritten signature in blue ink that reads "M. Majzoobi".

Mehrdad Majzoobi
CEO
Mesh Motion Inc
