CONNECTING TO THE APP

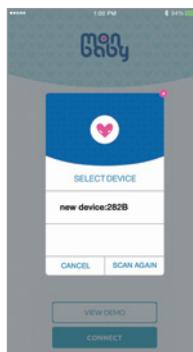

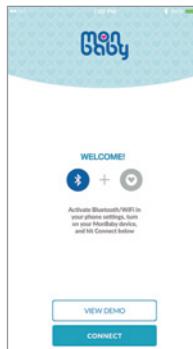

To make the setup process as quick as possible, enable Bluetooth® on your device before opening the MonBaby app by accessing the Bluetooth option in your phone's 'Settings' menu.

When you first open the MonBaby app, you are taken to the Connection Setup screen, which lets you connect the MonBaby Smart Button to the App.

If Bluetooth is already enabled on your device, the Bluetooth icon on the left should appear blue and you can proceed to the next step. If the Bluetooth icon is grey, you can tap it to enable Bluetooth on your phone.

For best performance, fasten the MonBaby at a location nearest to the center, between the baby's chest and abdomen.

REMOVING THE SMART BUTTON

To remove the MonBaby Smart Button, place your hand under your baby's pajamas and, using your index finger, push the smart button out through the hole in the center of the Enclosure. Be sure to have your other hand on the MonBaby Smart Button to collect it after you push it out, and remove the Enclosure as well. The MonBaby Smart Button can be stored inside of the Enclosure, and is put into standby mode automatically when not in use.

SAFETY AND OTHER IMPORTANT NOTES

MONBABY DOES NOT REPLACE PARENTING.

Your MonBaby product is a baby care aid, not a medical device, and it is not intended to diagnose, treat, cure or prevent any disease, including Sudden Infant Death Syndrome (SIDS).

MONBABY IS A SMART BABY MONITOR AND IS NOT INTENDED TO BE USED AS A TOY.

Your MonBaby product is not a substitute for responsible direct supervision by parents and adult caregivers. Check on your baby at regular intervals. Create a safe sleep environment for your baby, get training in infant resuscitation and immediately call the emergency assistance hotline in your area if your baby has stopped breathing.

Parents and caregivers should consult their qualified medical professional regarding sleep safety or SIDS risk reduction guidelines and check the relevant government issued recommendations in their area regarding this topic on an ongoing basis. Common guidelines for infant sleep and SIDS reduction, such as those issued by the American Academy of Pediatrics available at www.aap.org, include, but are not limited to the list below. Ensure to consult with your qualified medical professional prior to following any of the listed guidelines.

- Place your baby on his or her back for every sleep time.
- Always use a firm sleep surface.
- Your baby should sleep in the same room as you do, but not in the same bed (room-sharing without bed-sharing).

- Keep pillows, blankets, stuffed toys and other soft objects or loose bedding out of your baby's crib.
- Choose a safe crib without drop-side rails and never use a crib that has been recalled or that is broken or missing parts.
- Offer a pacifier at nap time and bedtime.
- Avoid covering your baby's head or overheating.
- Breastfeed as much and for as long as you can.
- Keep your baby away from smokers and places where people smoke.
- Consult your pediatrician as he or she may recommend variations from these guidelines based on your baby's individual circumstances.

CAREFULLY FOLLOW INSTRUCTIONS

Failure to follow instructions will result in erroneous MonBaby operations and could affect connectivity or accuracy of monitoring information.

WE RECOMMEND THAT MONBABY BE PLACED AT THE CENTER BETWEEN THE CHEST AND ABDOMEN OF THE BABY

Even though MonBaby can be placed anywhere and stores its position, we recommend that the MonBaby be placed near the center of the baby, between the baby's chest and abdomen.

MONBABY WORKS OPTIMALLY WHEN PLACED IN THE SAME ROOM WITH YOUR SMART PHONE

For optimal performance, please ensure to have the MonBaby Smart Button and your smart phone/device in the same room and in the line of sight of the baby crib. Although the MonBaby may work well at longer distances, environmental factors such as dense wall material made out of brick or metal or other devices in the home that may be

interfering with the MonBaby Smart Button may limit the range of the MonBaby device. For larger homes, please see the MonBridge (BLE-to-WiFi Range Extender) section below or contact us at support@mondevices.com.

FOR BETTER RESULTS, TURN OFF WIFI AND/OR 4G

When Bluetooth is on, sometimes it shares the same resources as Wi-Fi and 4G, which would hinder its performance.

MONBABY CANNOT CONNECT TO MORE THAN ONE SMARTPHONE AT A TIME

Currently, smartphones can only control one MonBaby Smart Button; 'Twin Mode' still under development for the MonBaby Smart Button but is available through the free MonBridge application. Please see the MonBridge (BLE-to-WiFi Range Extender) section below or contact us at

support@mondevices.com

IMPROVING BATTERY LIFE

For an improved battery life, log out of the application and turn off Bluetooth when MonBaby is not in use.

LEAVE YOUR DEVICE PLUGGED IN DURING NIGHT MONITORING

Ensure that your device on which the application is running is plugged in and charging during night monitoring when using the MonBaby.

APPLICATION FEATURES MAY CHANGE IN THE FUTURE

We are constantly working on improving certain features of the mobile application; some features may become unavailable, change or disappear.

CLEANING THE DEVICE

In case your MonBaby gets dirty, it can be cleaned carefully with a damp cloth or paper towel. Do not forget to take off the MonBaby before you throw dirty clothes in the washer.

MONBRIDGE (BLE-TO-WIFI RANGE EXTENDER)

The MonBridge application available on Google Play allows parents to extend the range of the MonBaby by the distance of their WiFi network provided that a second compatible Android™ device is available. The MonBridge app may also be made available as part of the MonBaby accessory pack or other company offering from time to time. For additional information such as setup instructions and availability, please visit our website at www.monbaby.com/monbridge or contact us at support@mondevices.com.
